

What follows is an example of a single project representing the sequence of events that occur during my process of design.

Note - It's how the sausage is made.

# Consumption Report Redesign

## Existing Consumption Report Implementation

## Solve for these identified issues

- Can't track usage of Clumio across the platform
- Trend and anomalies are not highlighted and buried
- Can't dive into the details of trends or anomalies
- There is no easy way to see how many type of credits I have
- There is no way to easily recharge credits
- I can't compare groups of assets across data sources
- There is very little flexibility in displaying dates and timeframes

## User

- Infrequent use, maybe at the top of the month.
- The user is looking for trending data
- Interested in highlighting anomalies and to act upon.
- Very interested in costs that have changed since last billing
- When will credits will run out or expire?

## Top Tasks

- Highlight exceptions, anomalies, alerts
- Data should be actionable
- Show usage trends
- Show credits
- Compare on assets, data sources and credit use
- Show credit burn
- Affordance to refill credits
- At-a-glance view of monthly use

## Support these ancillary flows

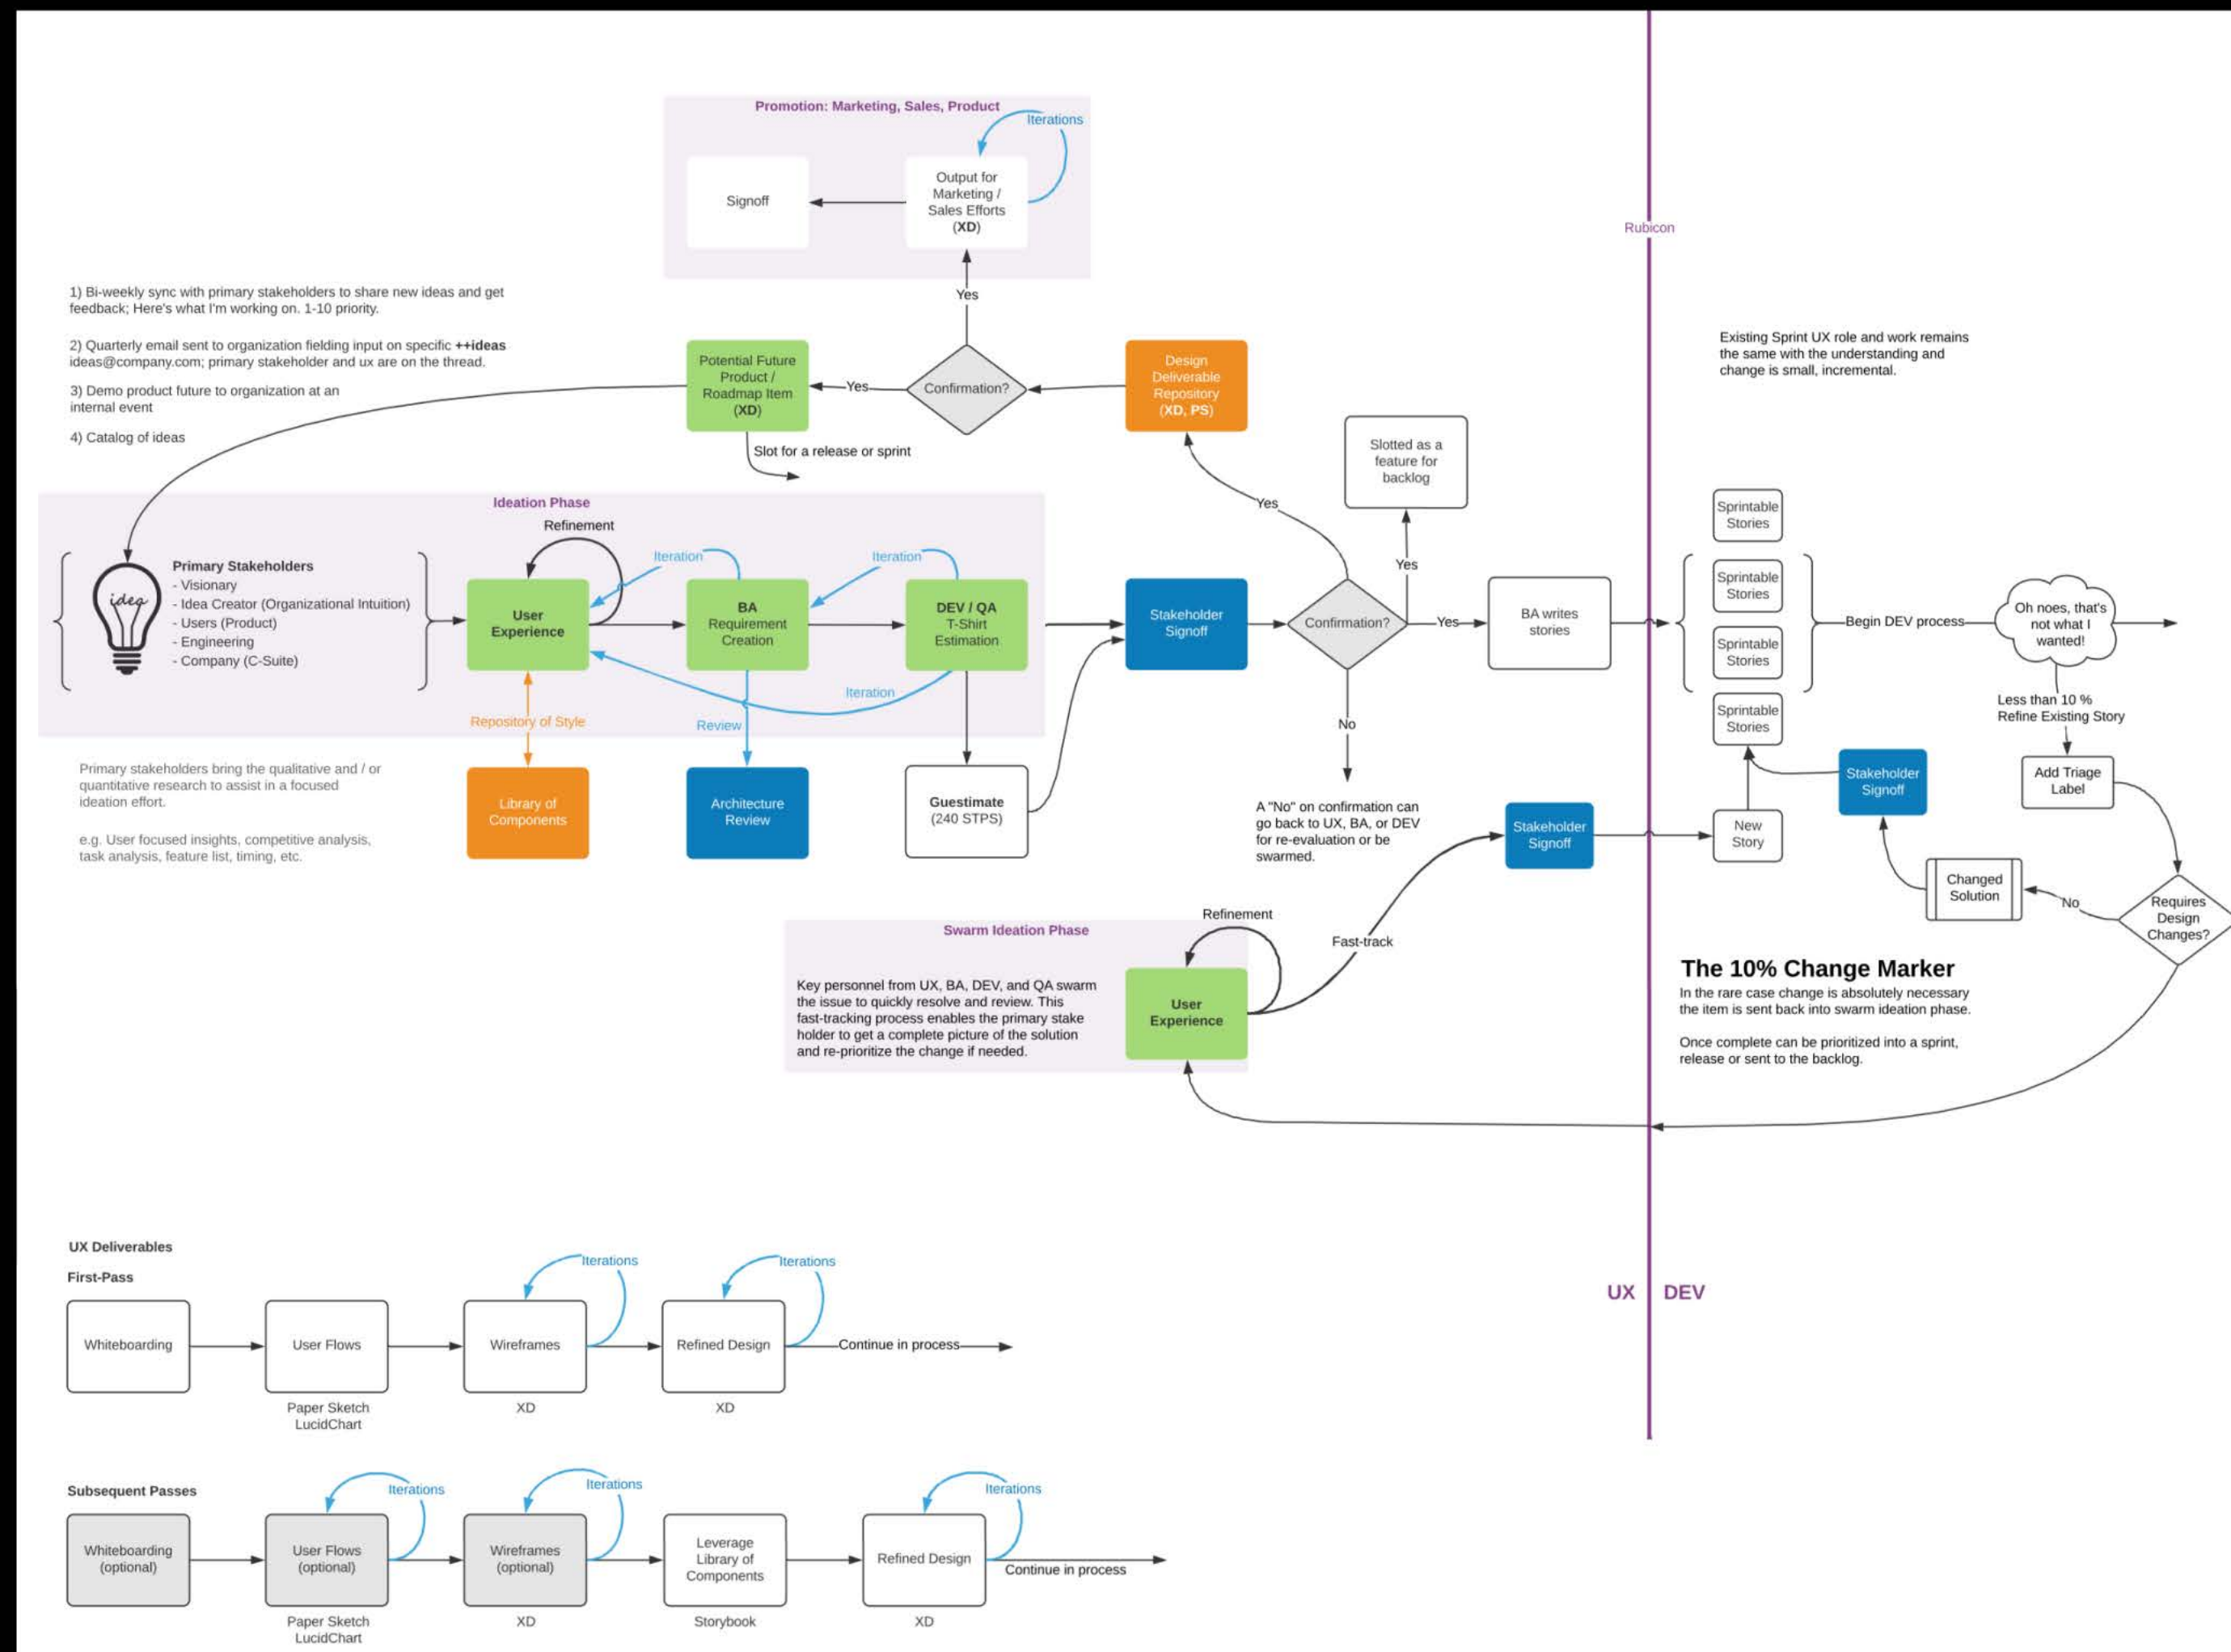

- Create Report popup
- Recharge / Refill Credits
- Edit Credit Details
- Report Settings Screen (Daily Summary Email, Show / Hide Data Sources)
- Daily Detail Overview (showing most active assets across data sources)
- Zero State / Default View

# The UX Diamond @ 20,000ft

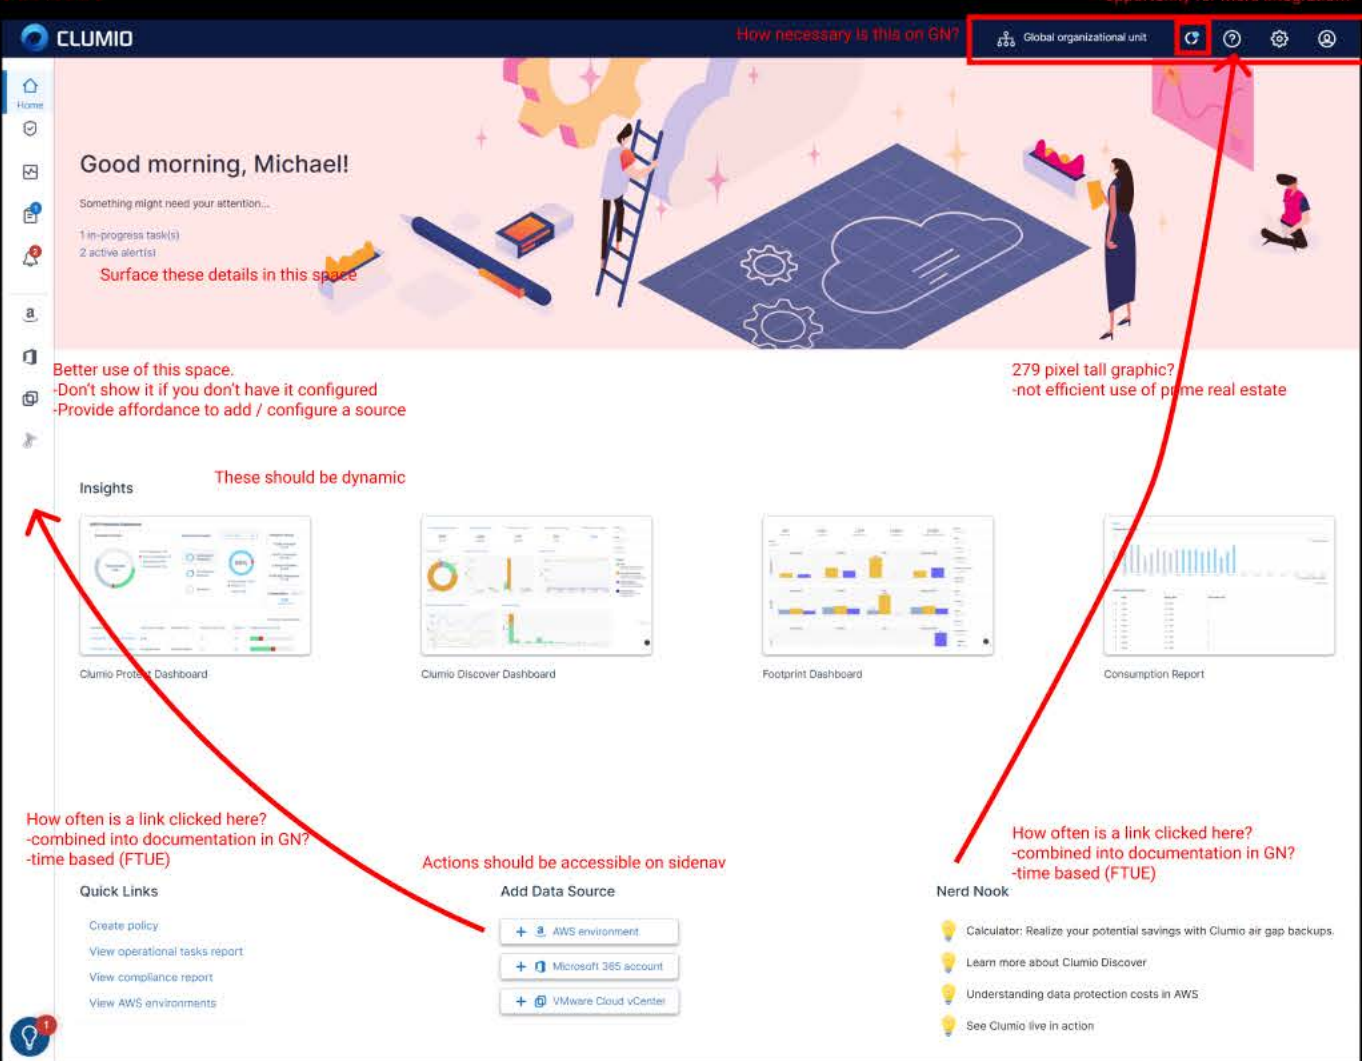

# Here's the ideation flow graph I use as a guideline representing ideation through implementation.

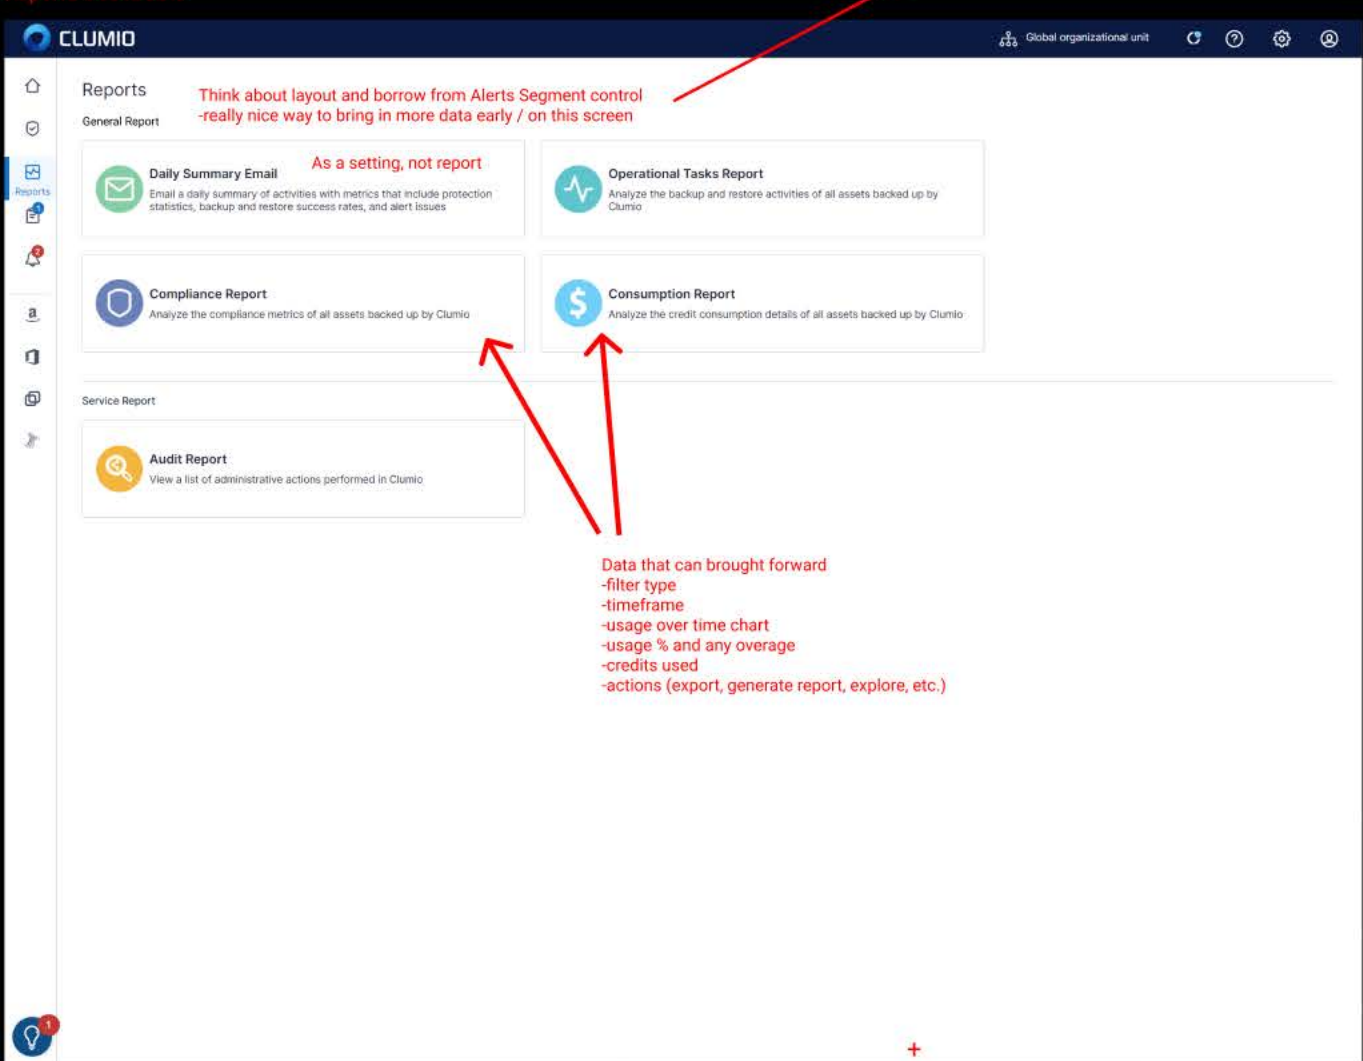

# Redlines - Impressions after reviewing current implementation

## Dashboard

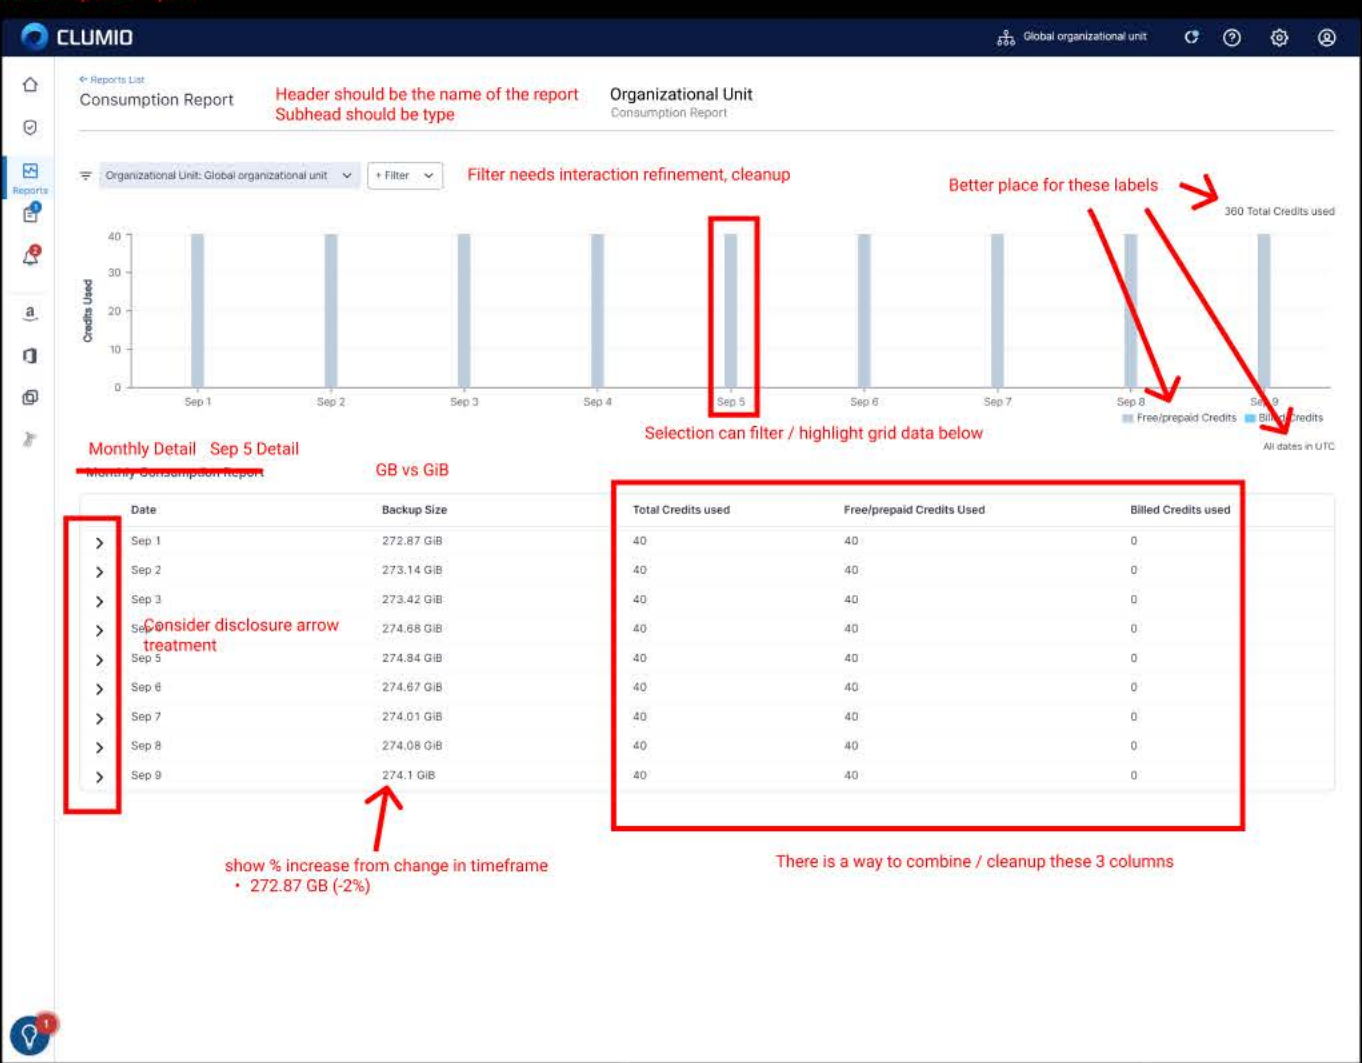

## Reports Dashboard

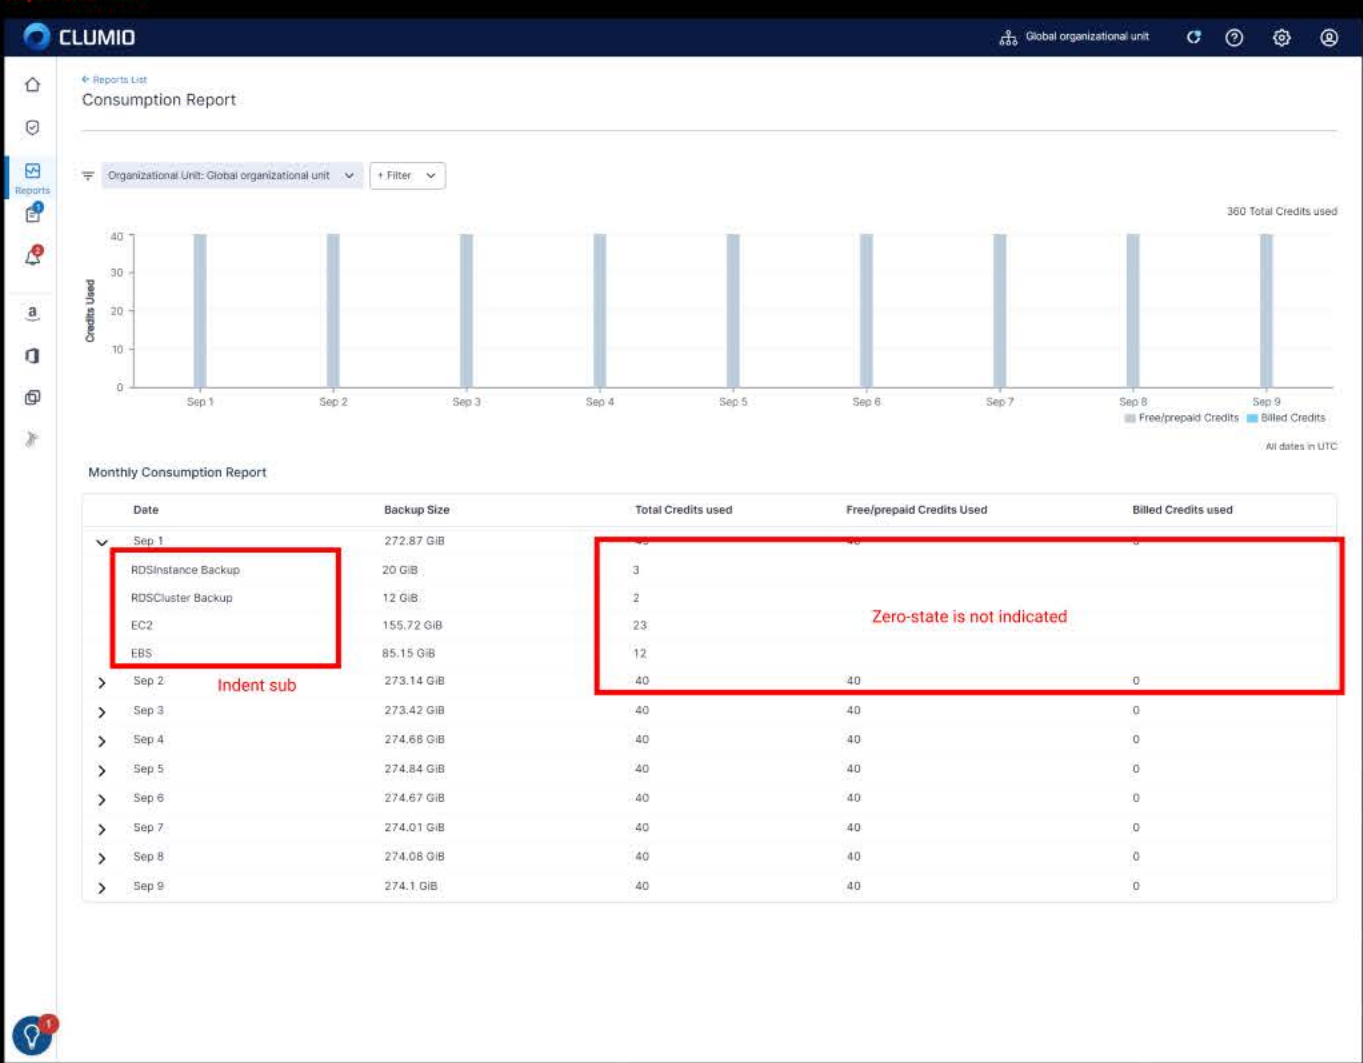

Consumption

- data in GB over time
- credits / usage over time
- show change from timeframe selected
- filter can change the consumption target

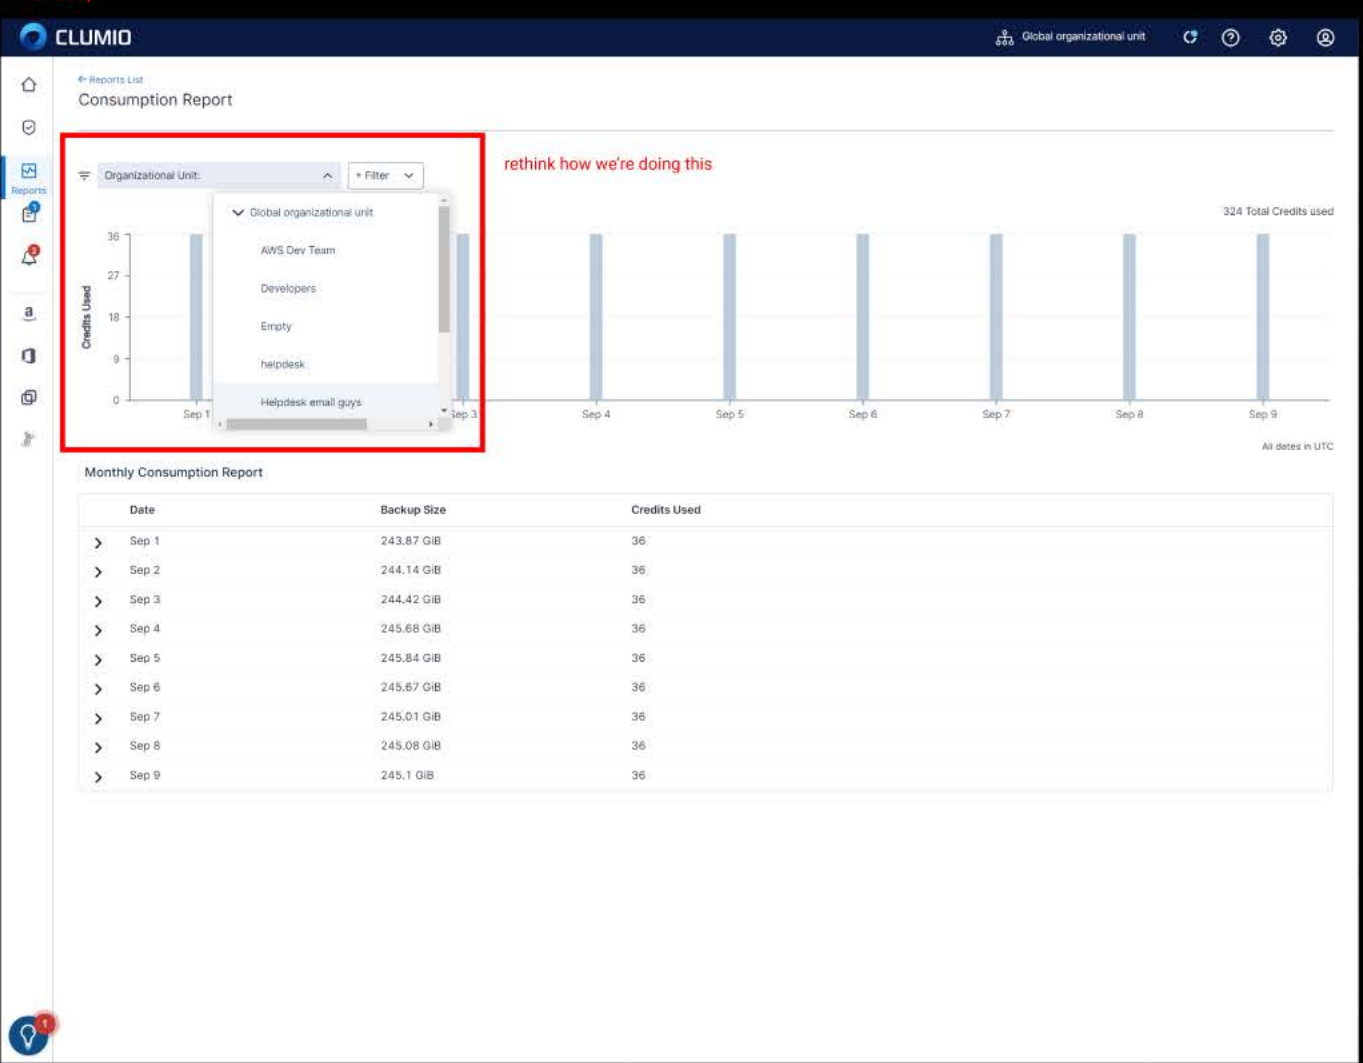

## Consumption Report

## Expanded Grid

## Filter Drop

## Notes - Impressions after reviewing current implementation

DISCUSSION - ADOBE

MARIL SYN L P 9/10

WALK ME THROUGH EACH REPORT TYPE

- DETAIL USAGE
- FRACTION
- GREAT FOR IMPROVEMENT
- SHORT TERM (MIN)
- LONG TERM (MAX)
- TIMING?
- RESOURCES AVAILABLE?
- EMAIL OF REPORT

GET RATIONAL  
BEANS BAK REPORT

GET INTO PRODUCTION

- CONSUMPTION REPORT
- COMPLIANCE REPORT
- SCREENSHOT FLOW
- STATUS MARKING UP THE EXISTING DESIGN
- CAN DETAIL ON MAN. AFTERNOON

GET PENDING ACT ADDRESS TO OKTA, PERMISSIONS

OBSERVED FRUSTRATIONS - EXISTING EXPERIENCE

- EACH SIDENAV SECTION IS DIFFERENT LOOKING, WHILE SHOWING SIMILAR DATA.
- STATE INSIDE OF A SECTION IS NOT SAVED WHEN CLICKED OUT OF.
- WHY NOT USE SEGMENT CONTROL ON "REPORTS"?
- FILTER IS NON-EFFICIENT IN USAGE, NOT CONSISTENT ACROSS APP
- DEVS EXPECTED USAGE FOR THAT STYLE OF PATTERN?
- IS THERE ANOTHER WAY TO FILTER SCREENS W/O USING FILTER CTRL?
- CONNECT CHART TO DATA GRID
- CREDIT USAGE COULD BE BETTER PROMOTED
- CHART COULD BE BEAUTIFIED, MORE GRANULARITY BETWEEN DAYS
- GRID COULD BE BETTER UTILIZED

## Notes from initial Product conversation

TONS OF LOVE

- MULTIPLE PHASES

DAILY SUMMARY EMAIL

- OPT OUT DESIRES

- NEED EXPLICIT OPT-OUT FOR THIS (FREQ, TYPE, SENSITIVE)

- DOESN'T NEED TO BE A REPORT

DISCOVER -> REPORT (MAYBE AT SOME POINT)

X AVOID REPORT

- DATA SHOWN - GOOD SPOT FOR NOW

X OPERATIONAL TASKS REPORT

- FIND AS IS

CONSUMPTION

- UNIVERSAL CHARTS (ULTIMATELY ACROSS PLATFORMS) FOR COST + DATA

- BACKEND ENG NEEDS TO BE DONE (MAPPING BEHIND THE SCENES)

- 2 METROLOGIES FOR CREDIT

- PAY AT YOUTUBE

- PRE-PAY (BURN RATE)

- WHEN ON E GOING TO RUN OUT?

Design values exercise

Design Values

# Design Values (consumption)

The most critical UX values to preserve in the design, and what is less important and can be traded off to ensure the critical values are achieved.

Critical

Auditable  
provides clear and complete records

Understandable  
very clear what's happening

Confidence-Building  
inspires trust, provides reassurance

Customizable  
specific to particular org

Important

Efficient  
most frequent tasks done quickly

Powerful  
flexible and configurable

Feels Simple  
approachable/low mental burden

Consistent with Clumio  
similar to rest of product UI

Less Important

Near At Hand  
easily available from anywhere

Learning Not Required  
easy to use the first time

Consistent with AWS  
similar to AWS UI

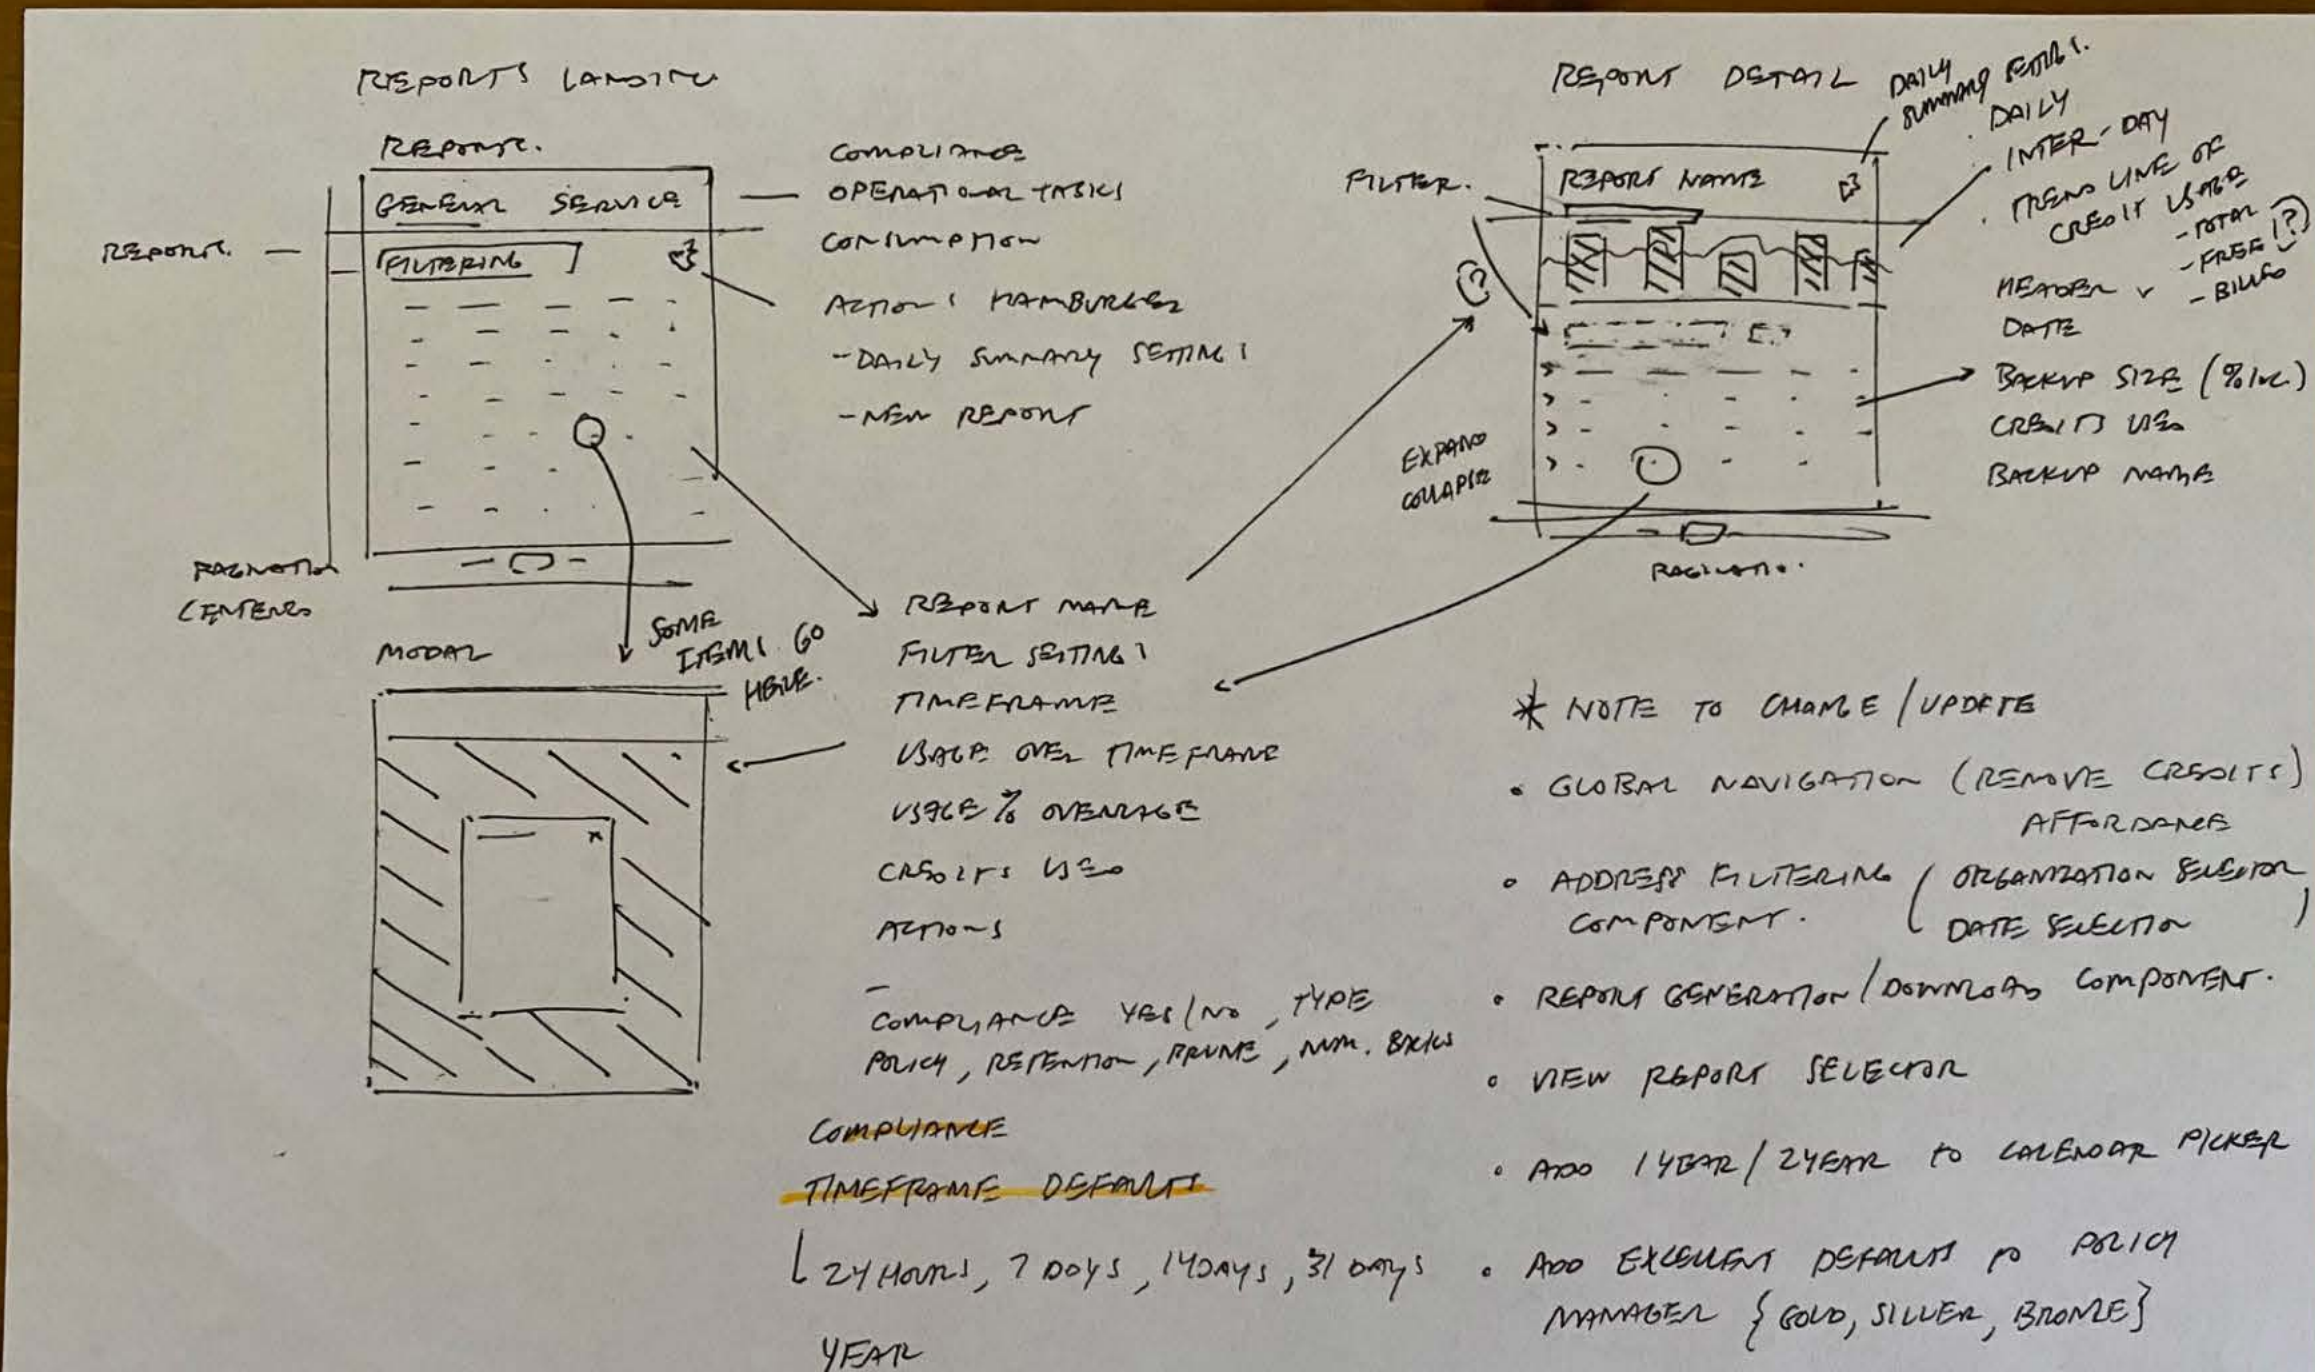

Wow  
emotional impact

Innovative  
new with respect to competitors

Minimize Dev & Design  
fast and cheap to build

# Initial solution from gathering requirements, conversations, competitive analysis

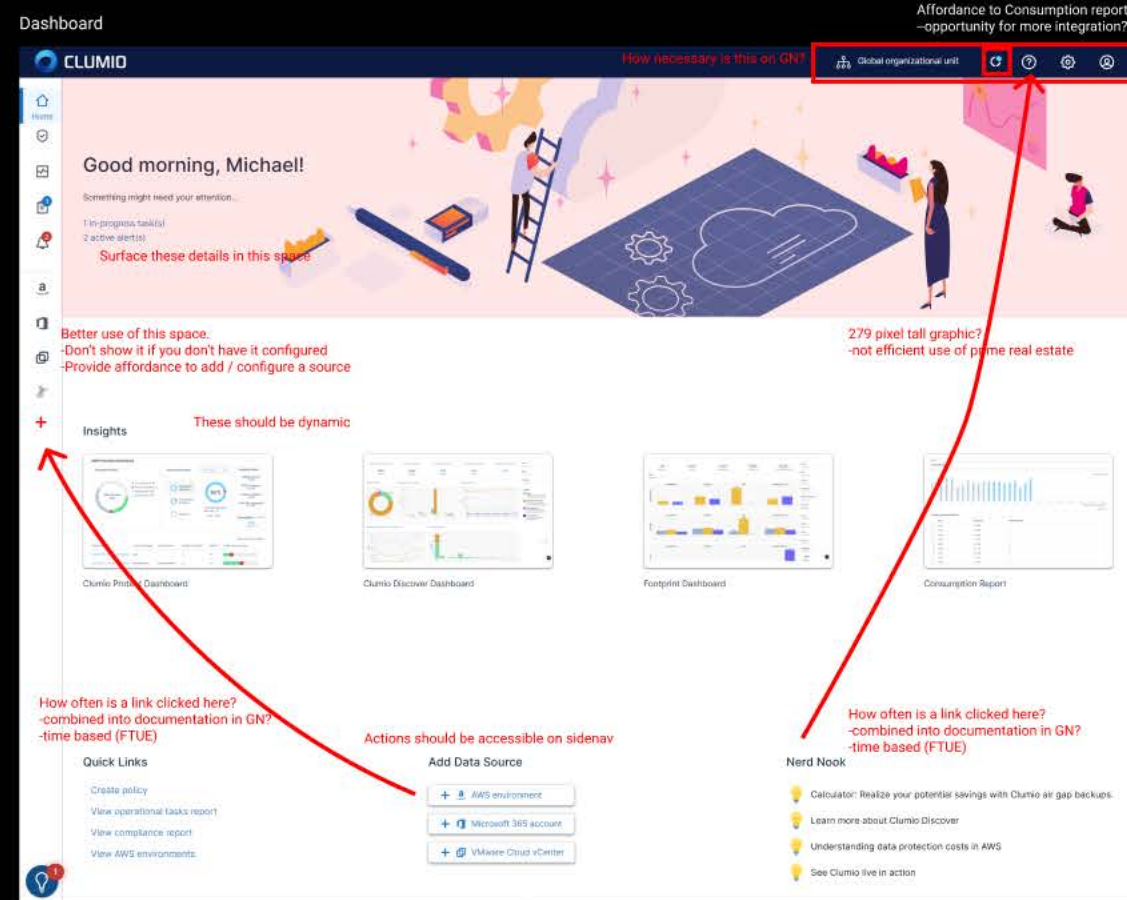

## Wireframe - Initial user flow

# Consumption Report

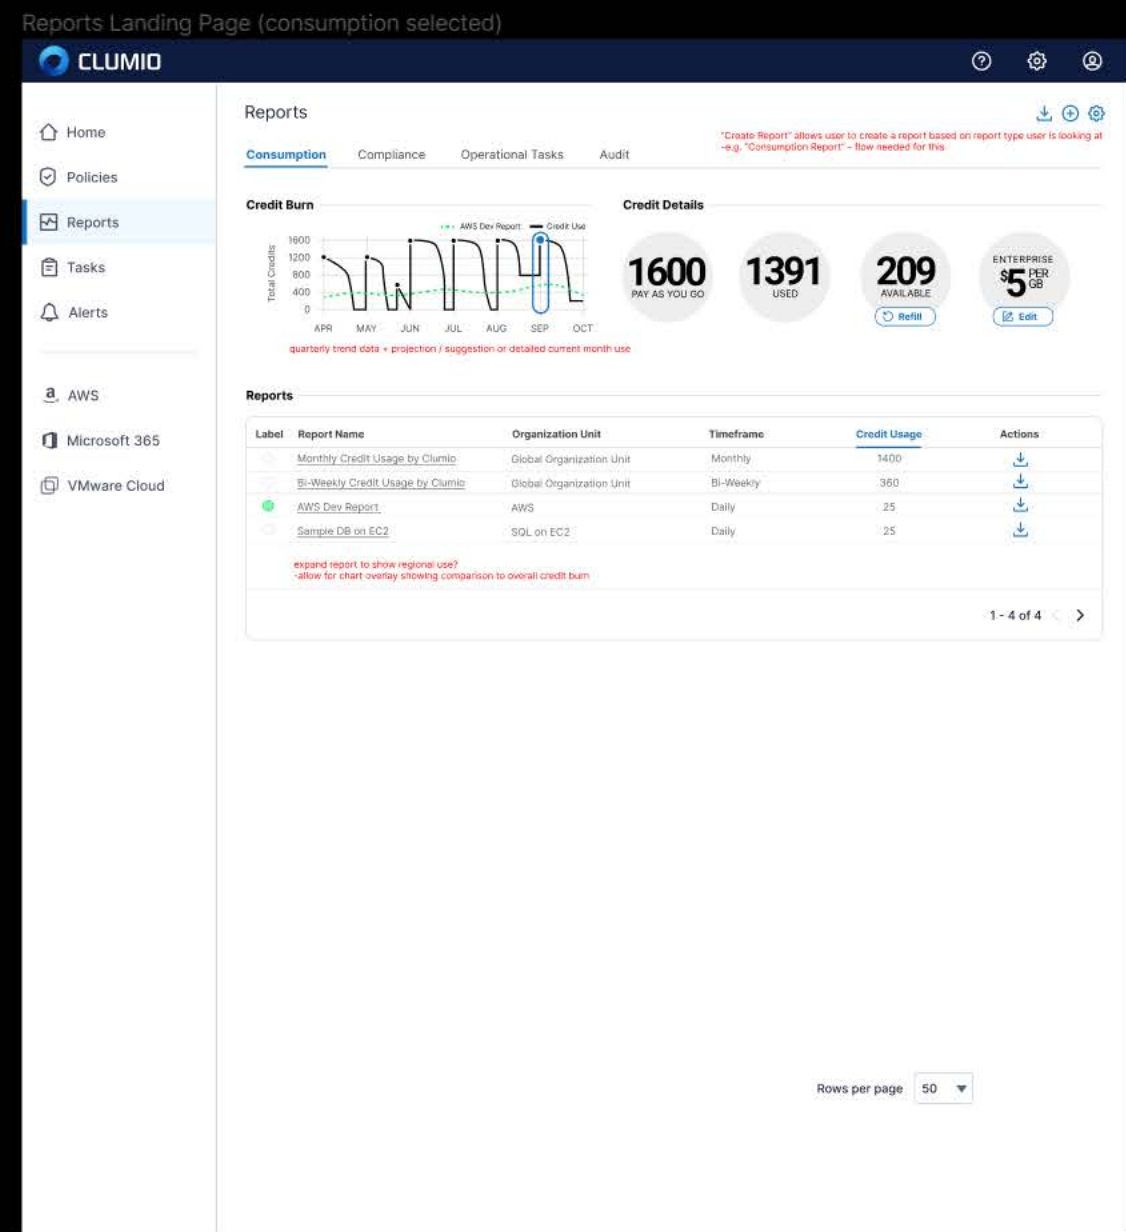

How many credits do I have, how are they being spent and how can I refill / purchase more?

- Top Tasks
- Highlight exceptions, anomalies
- Be able to act on data
- Show usage trends
- Show credits
- Compare on assets, data sources and credit use
- Show credit burn
- Affordance to refill credits
- At-a-glance view of monthly use

User

Infrequent use, maybe at the top of the month. The user is looking for trending data and interested in highlighting anomalies to act upon. Very interested in costs that have changed since last billing and when credits will run out.

## Key Problems

### Can't track usage of Clumio across the platform

Trend and anomalies are not highlighted and buried

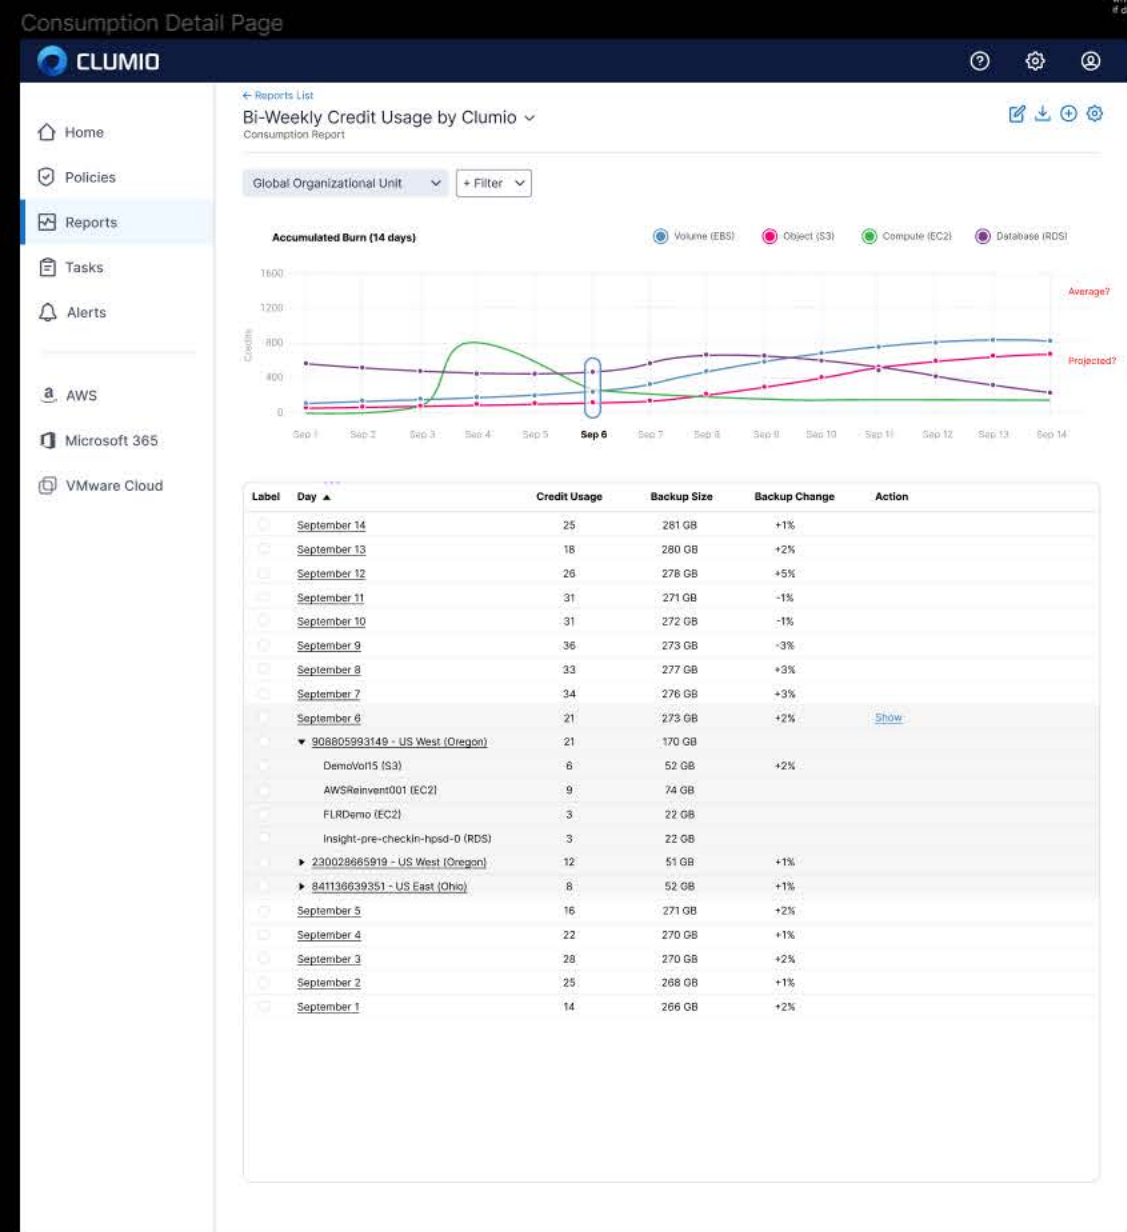

Can't dive into the details of trends or anomalies

There is no easy way to see how many type of credits I have

There is no way to easily recharge credits

I can't compare groups of assets across data sources

There is very little flexibility in displaying dates and timeframes

Create Report popup

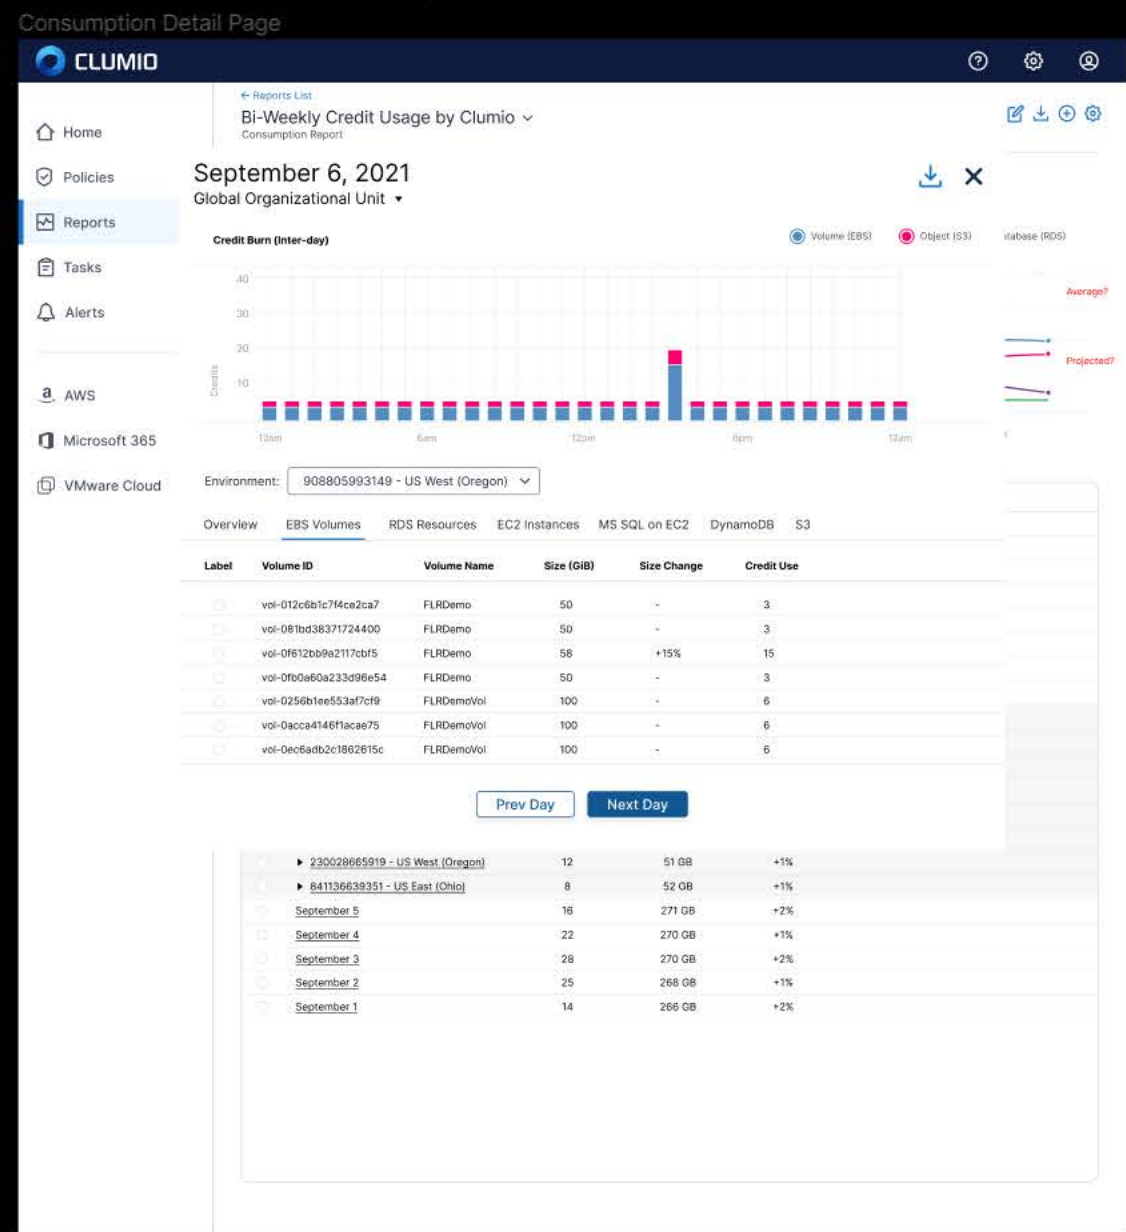

### Recharge / Refill Credits

Edit Credit Details

Report Settings Screen (Daily Summary Email, Show / Hide Data Sources)

Daily Detail Overview (showing most active assets across data sources)

### Zero State / Default View

Region List / Datasource Type

Credit Use  
By Chapter

% Change  
Backup Size

Backup Size  
Backup Diff

User is dropped into "Overview" where they can see the

most consuming assets by type. They can click into each separate

They can click into each separate datasource type and investigate / track an asset performance size and credit

The user can output a report of this use representing a single

day segment of time.

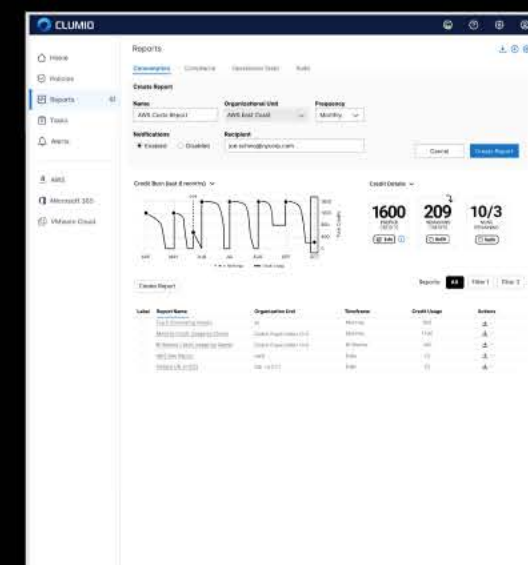

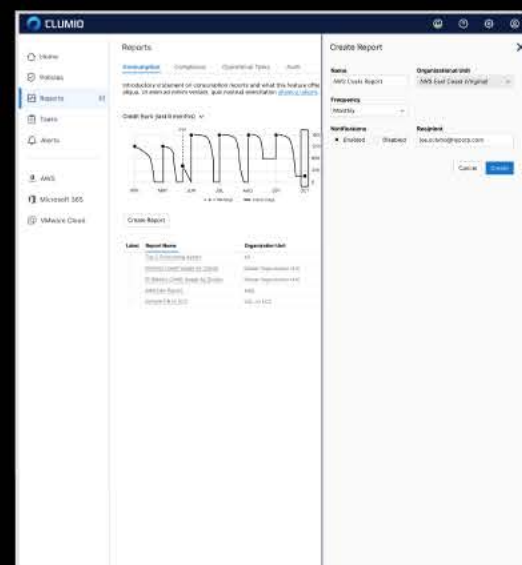

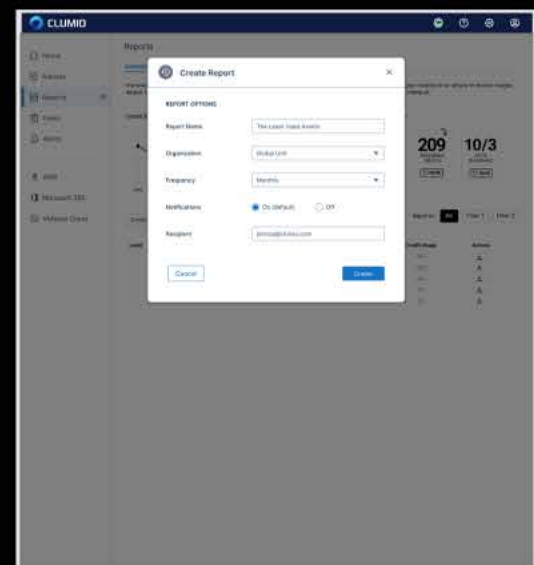

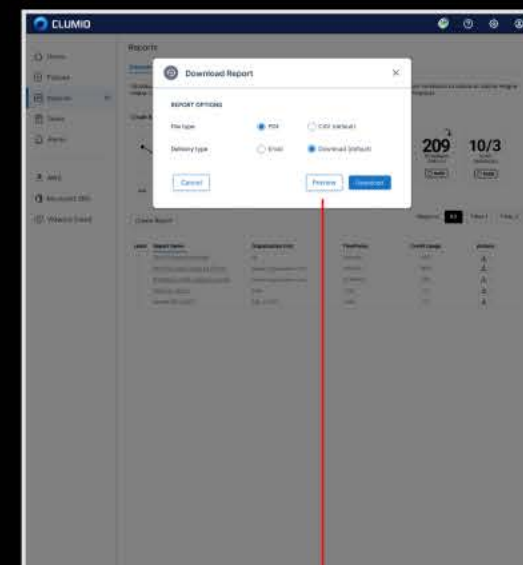

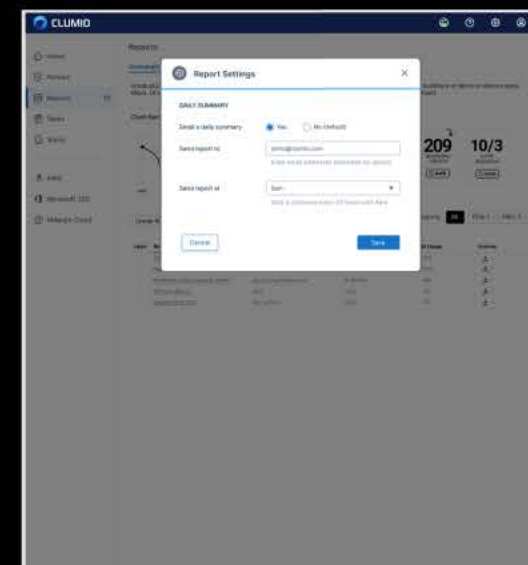

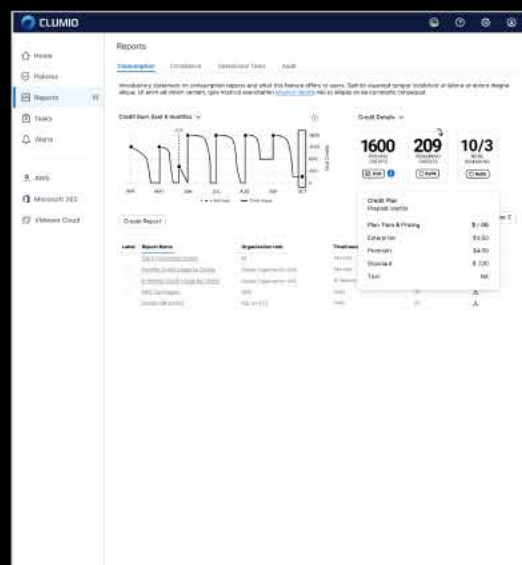

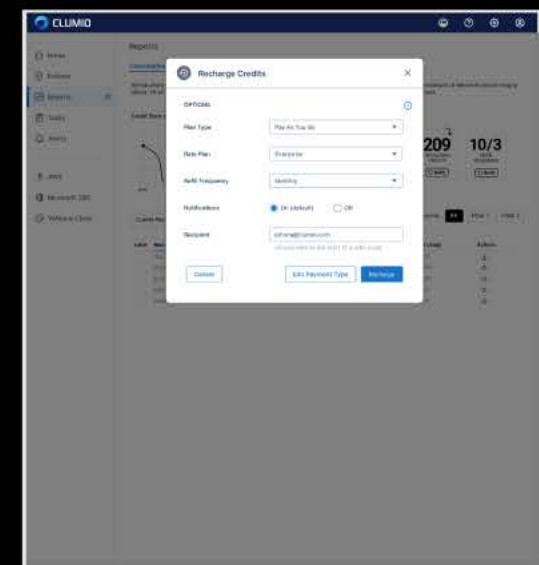

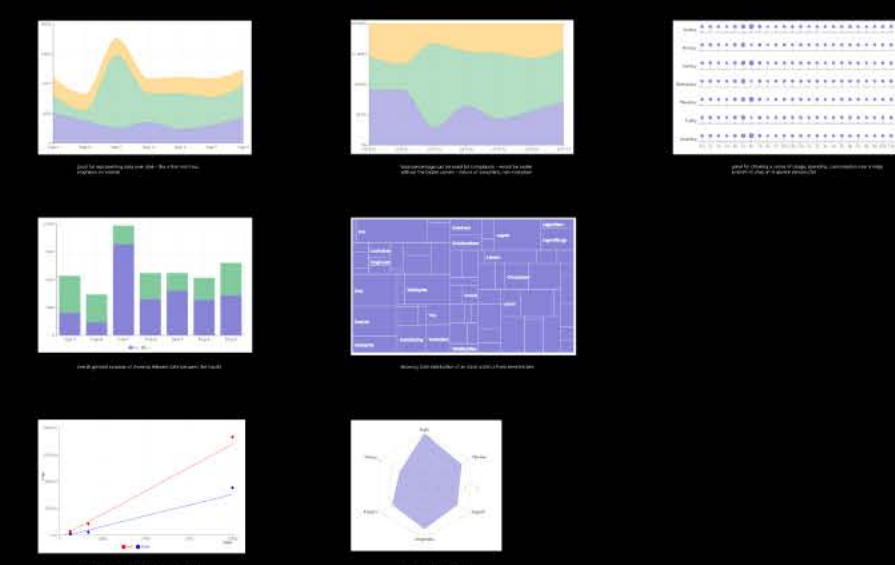

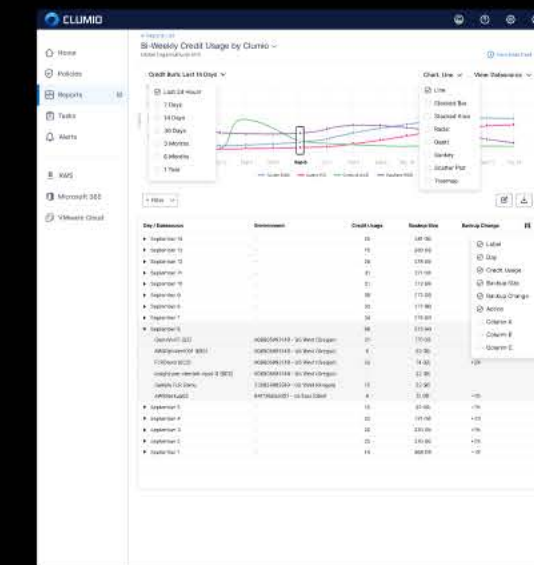

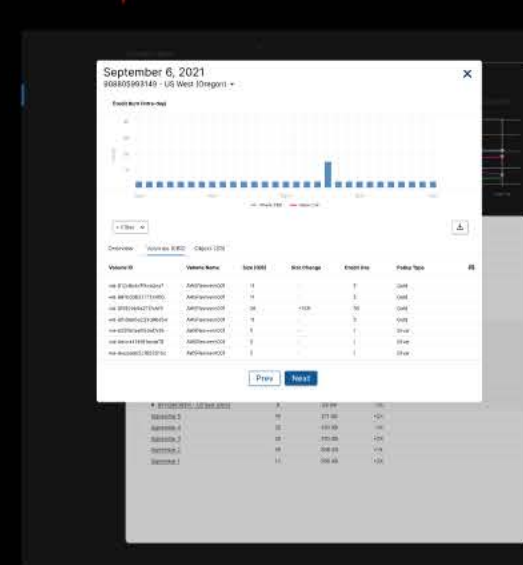

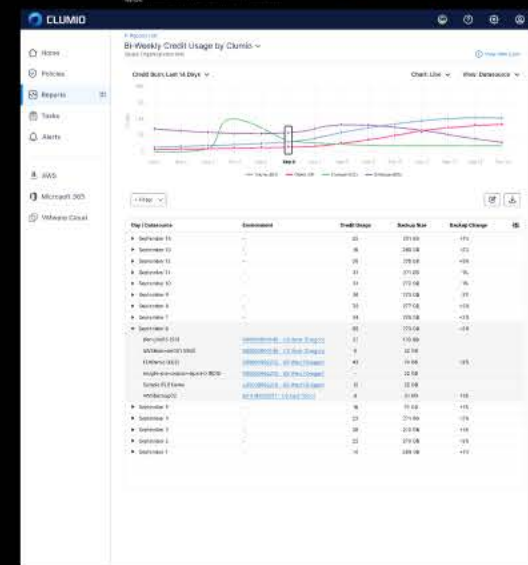

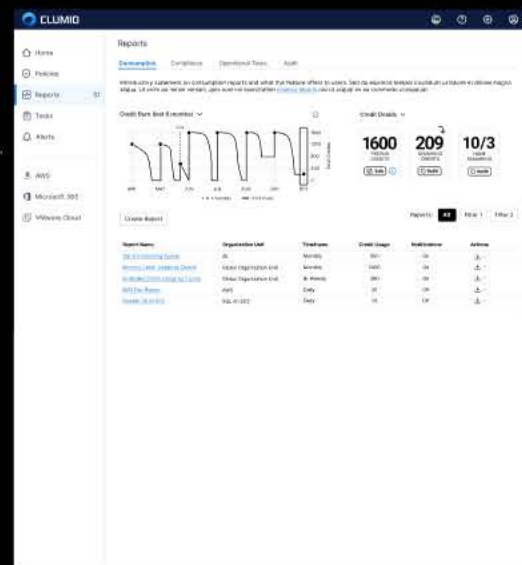

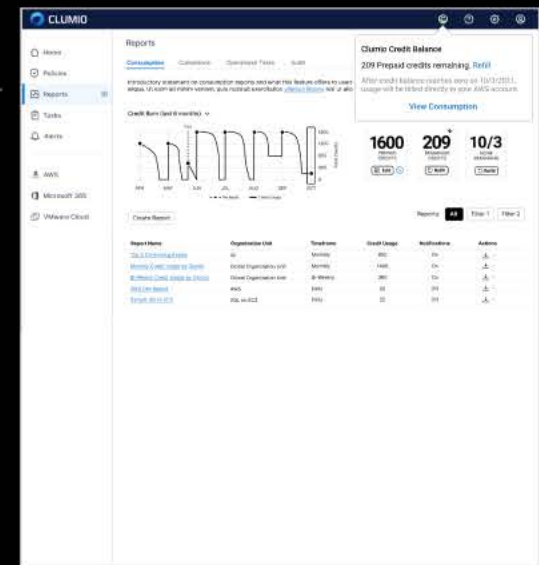

# Wireframe + User Flow v.4

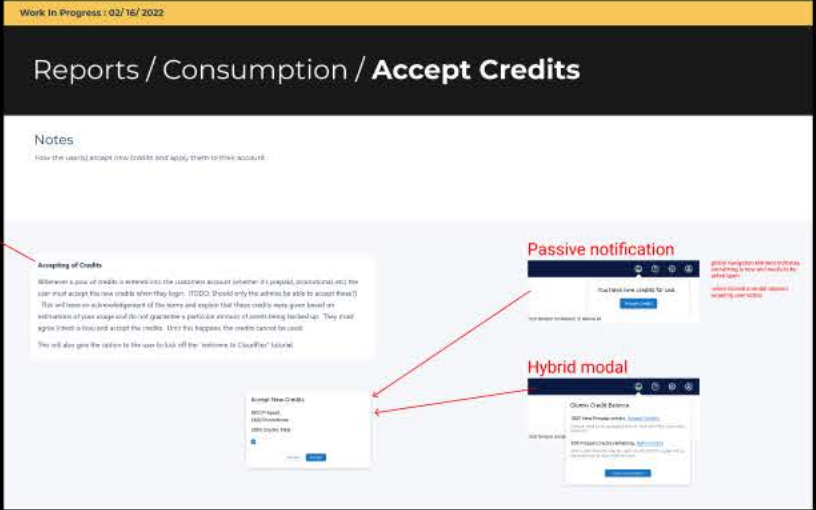

Go to Credit Refill Modal to Edit or Refill

Different data visualizations based on table pivot

Compare Functionality?

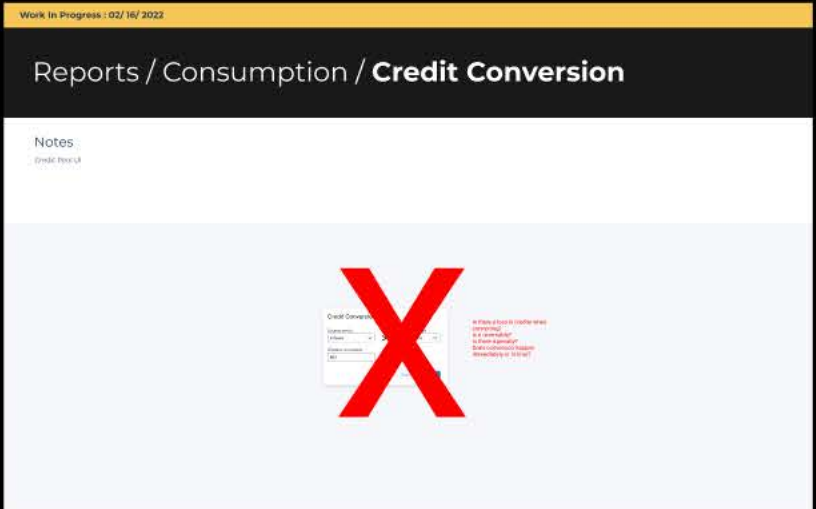

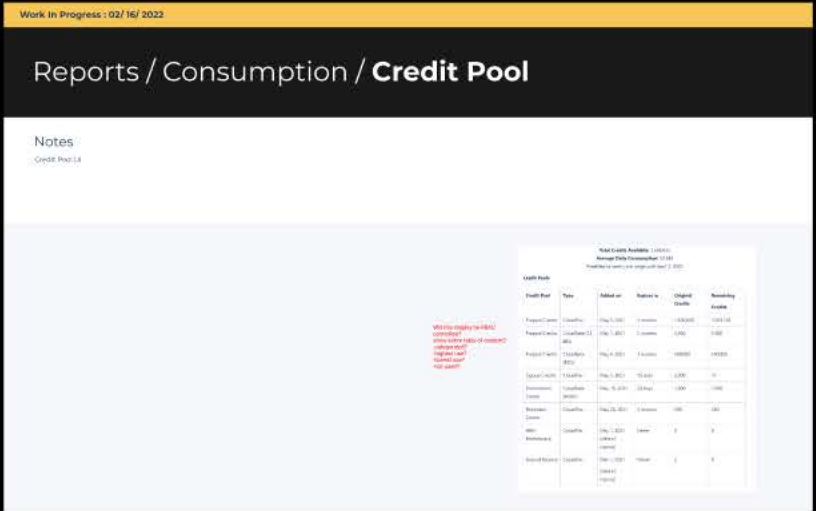

Preview Report Layout

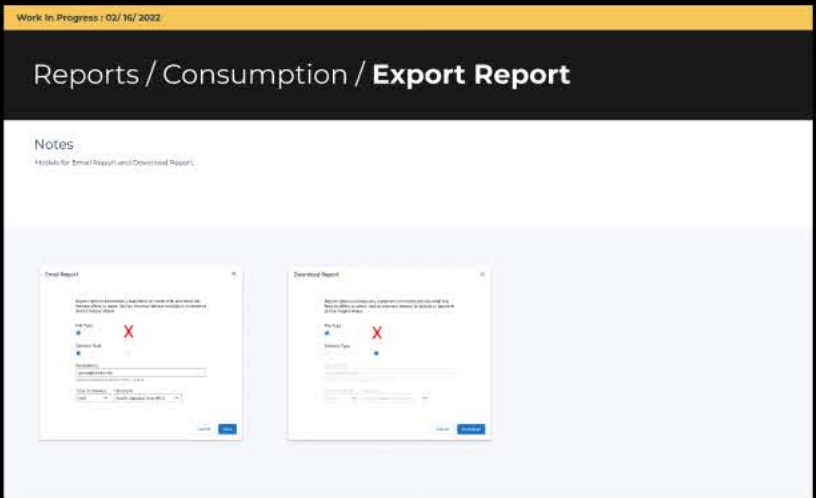

global navigation control and access -does the user always see the link to the CloudFlex tutorial?

-what is the cloudflex tutorial?

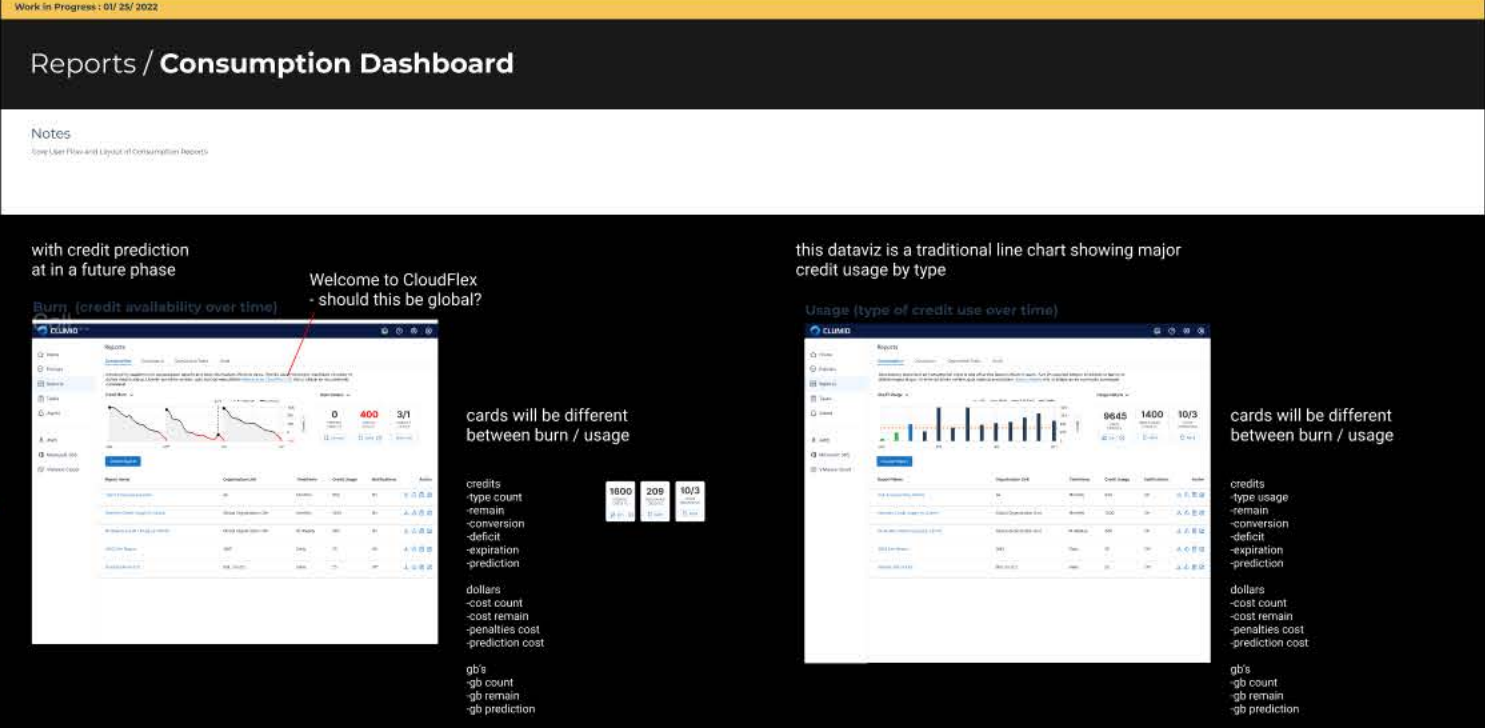

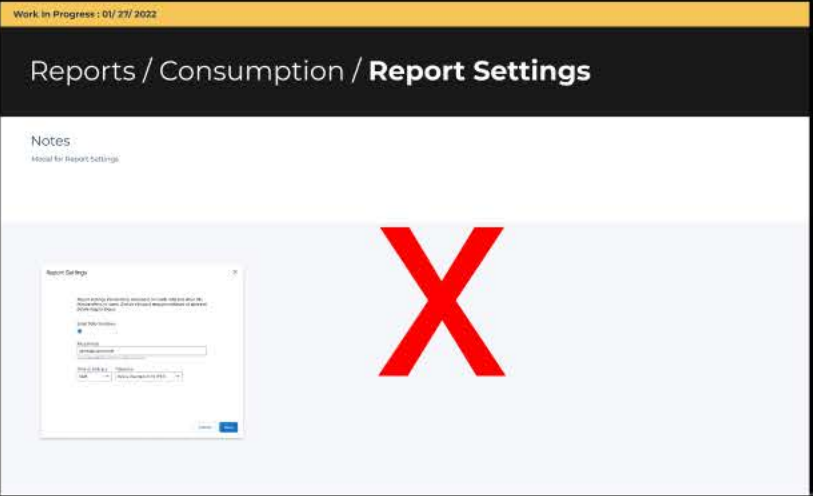

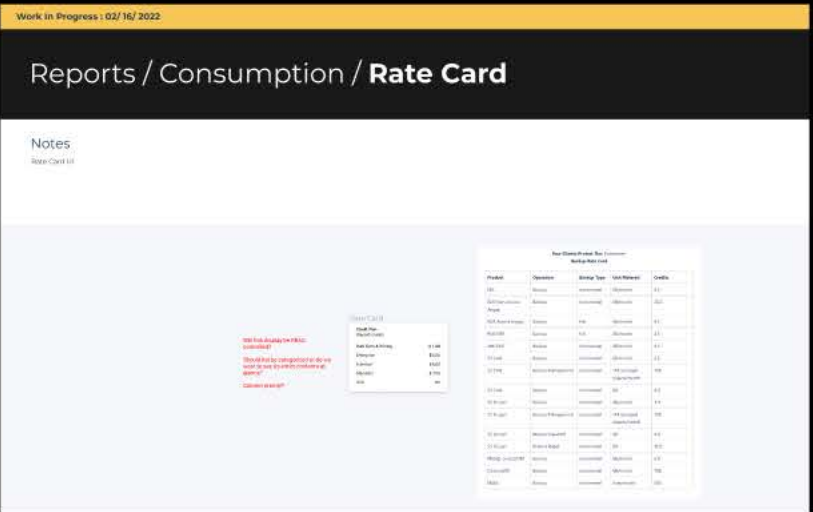

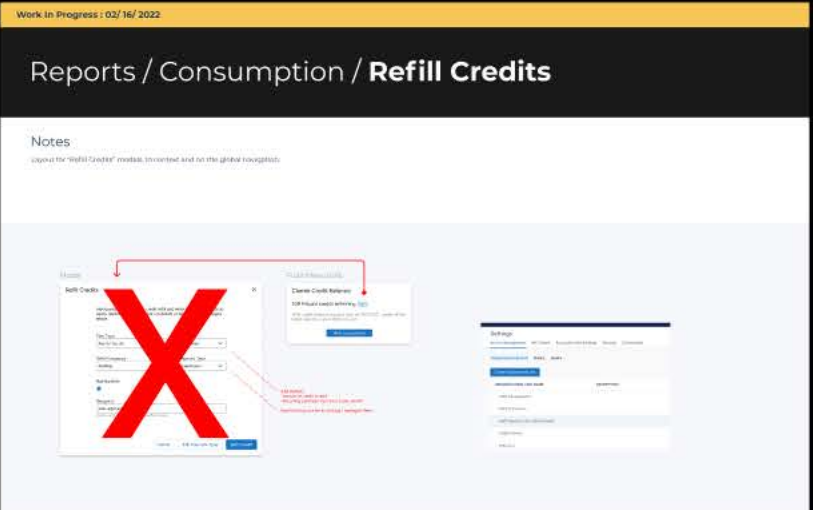

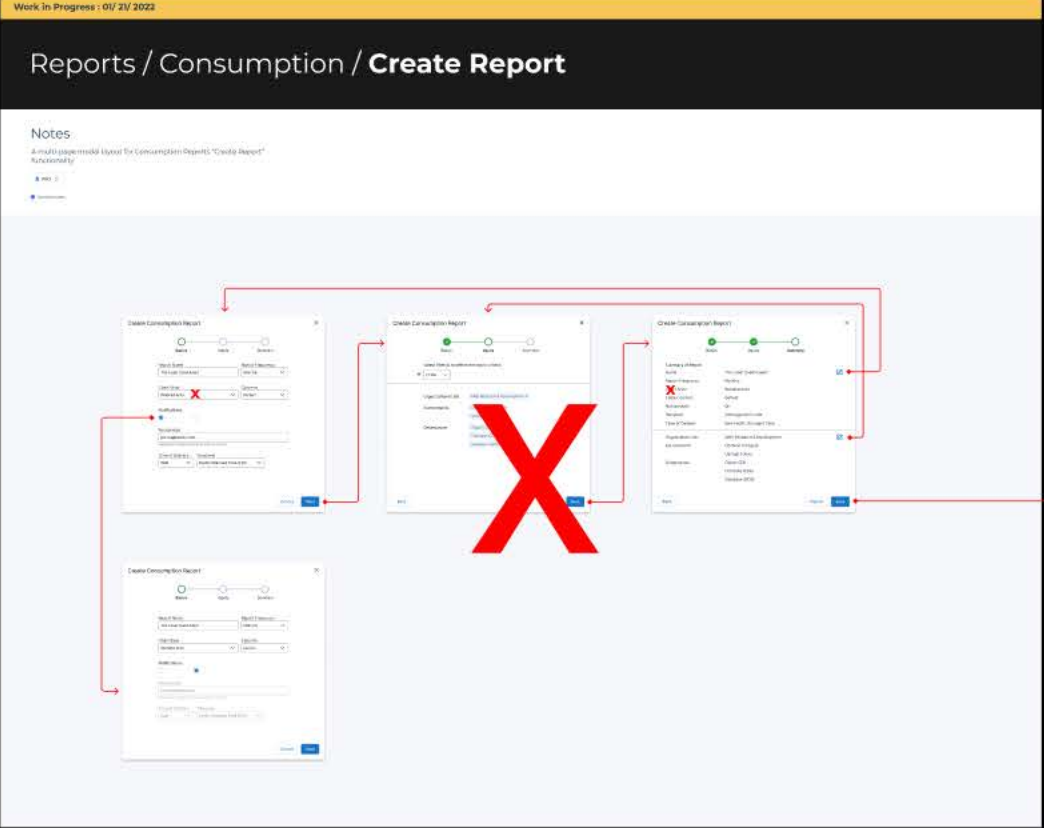

-pendo document?

Will need to consider amount to refill -auto or manual -confirmation

Will need to consider -csv format -PDF format

2 Chart Styles Locked to its type - not user selectable Line, Bar

6 Filters Asset Type (e.g., S3, RDS) Org Unit Policy Clumio Service Offering (e.g., S3 Frozen, S3 Cold, RDS GRR, RDS Airgap) Cloud Account Number Cloud Region

Questions

- For phase 1 are we doing self-service credit refill?
- RBAC and limiting access (to details) based on role
- Export Reports
  - single interface?
  - contextual to view?
- Let's discuss
  - Accepting Credits
  - Credit Pool
  - Rate Card
  - Credit Conversion

## Notes

Work In Progress : 02/16/ 2022

## Notes

The screenshot displays the 'Download Report' window. In the 'Report Selection' area, 'All Reports' is chosen from the 'Report Type' dropdown. The 'Report Name' text box contains 'Download Report'. Under 'Print Options', the 'Print Range' is set to 'Entire Worksheet (A1:ZIV)'. Buttons for 'Cancel' and 'OK' are at the bottom.

# High Fidelity, Simplified

## Notes

**CLIMB**

**Consumption Report**

**Lodge - Bar**

**5,524 kWh** (12/31/2018) (12/31/2018)

**Chart Usage**

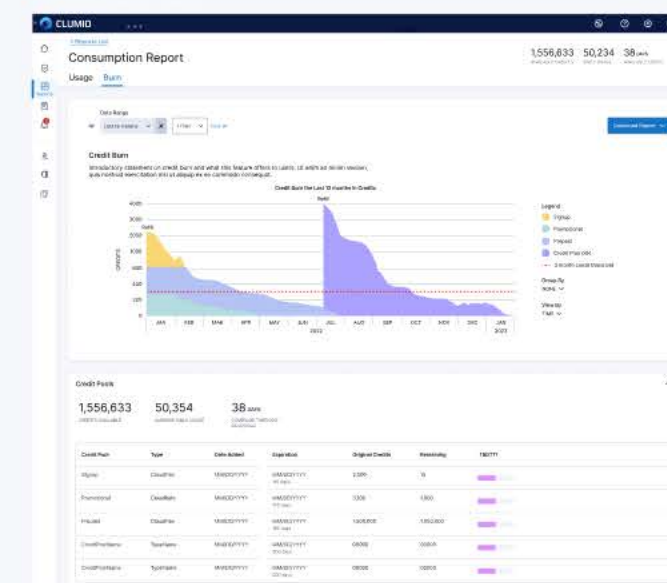

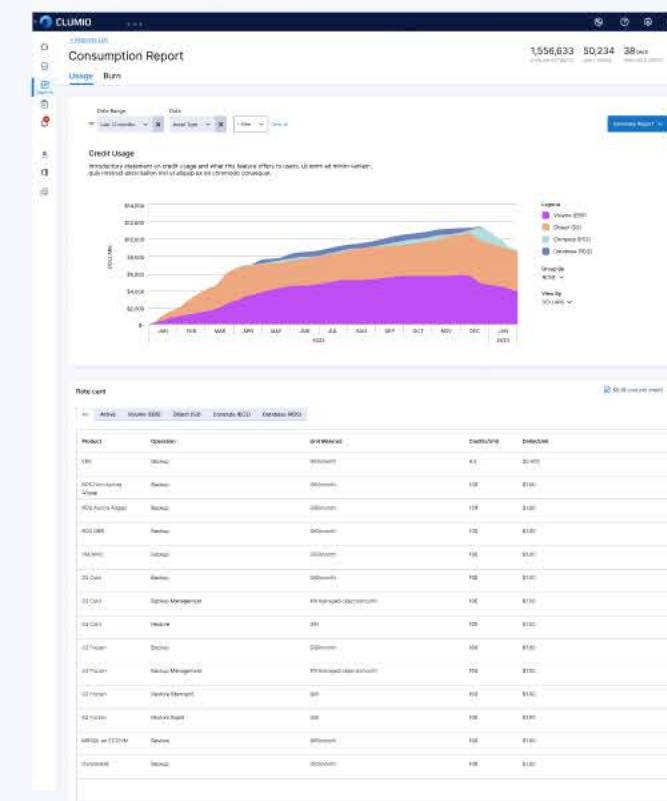

activity for consumption for a specific usage and what this breaks down is there is a graph on the right column.

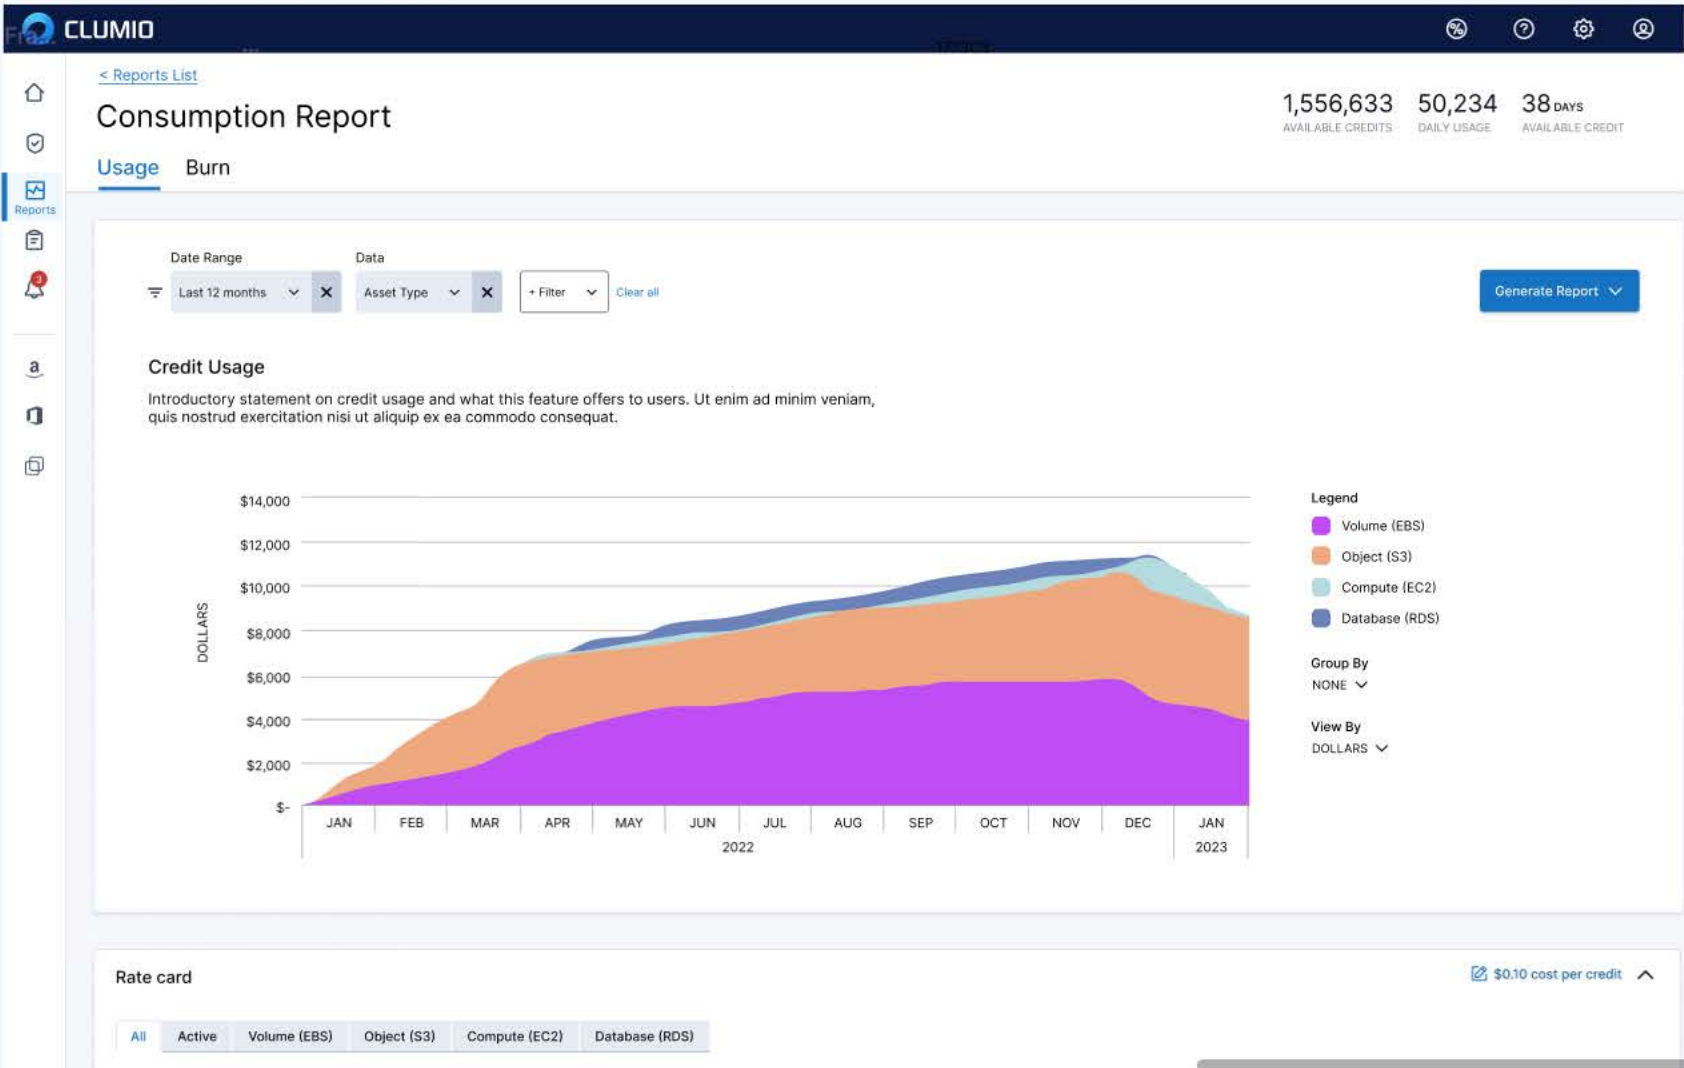

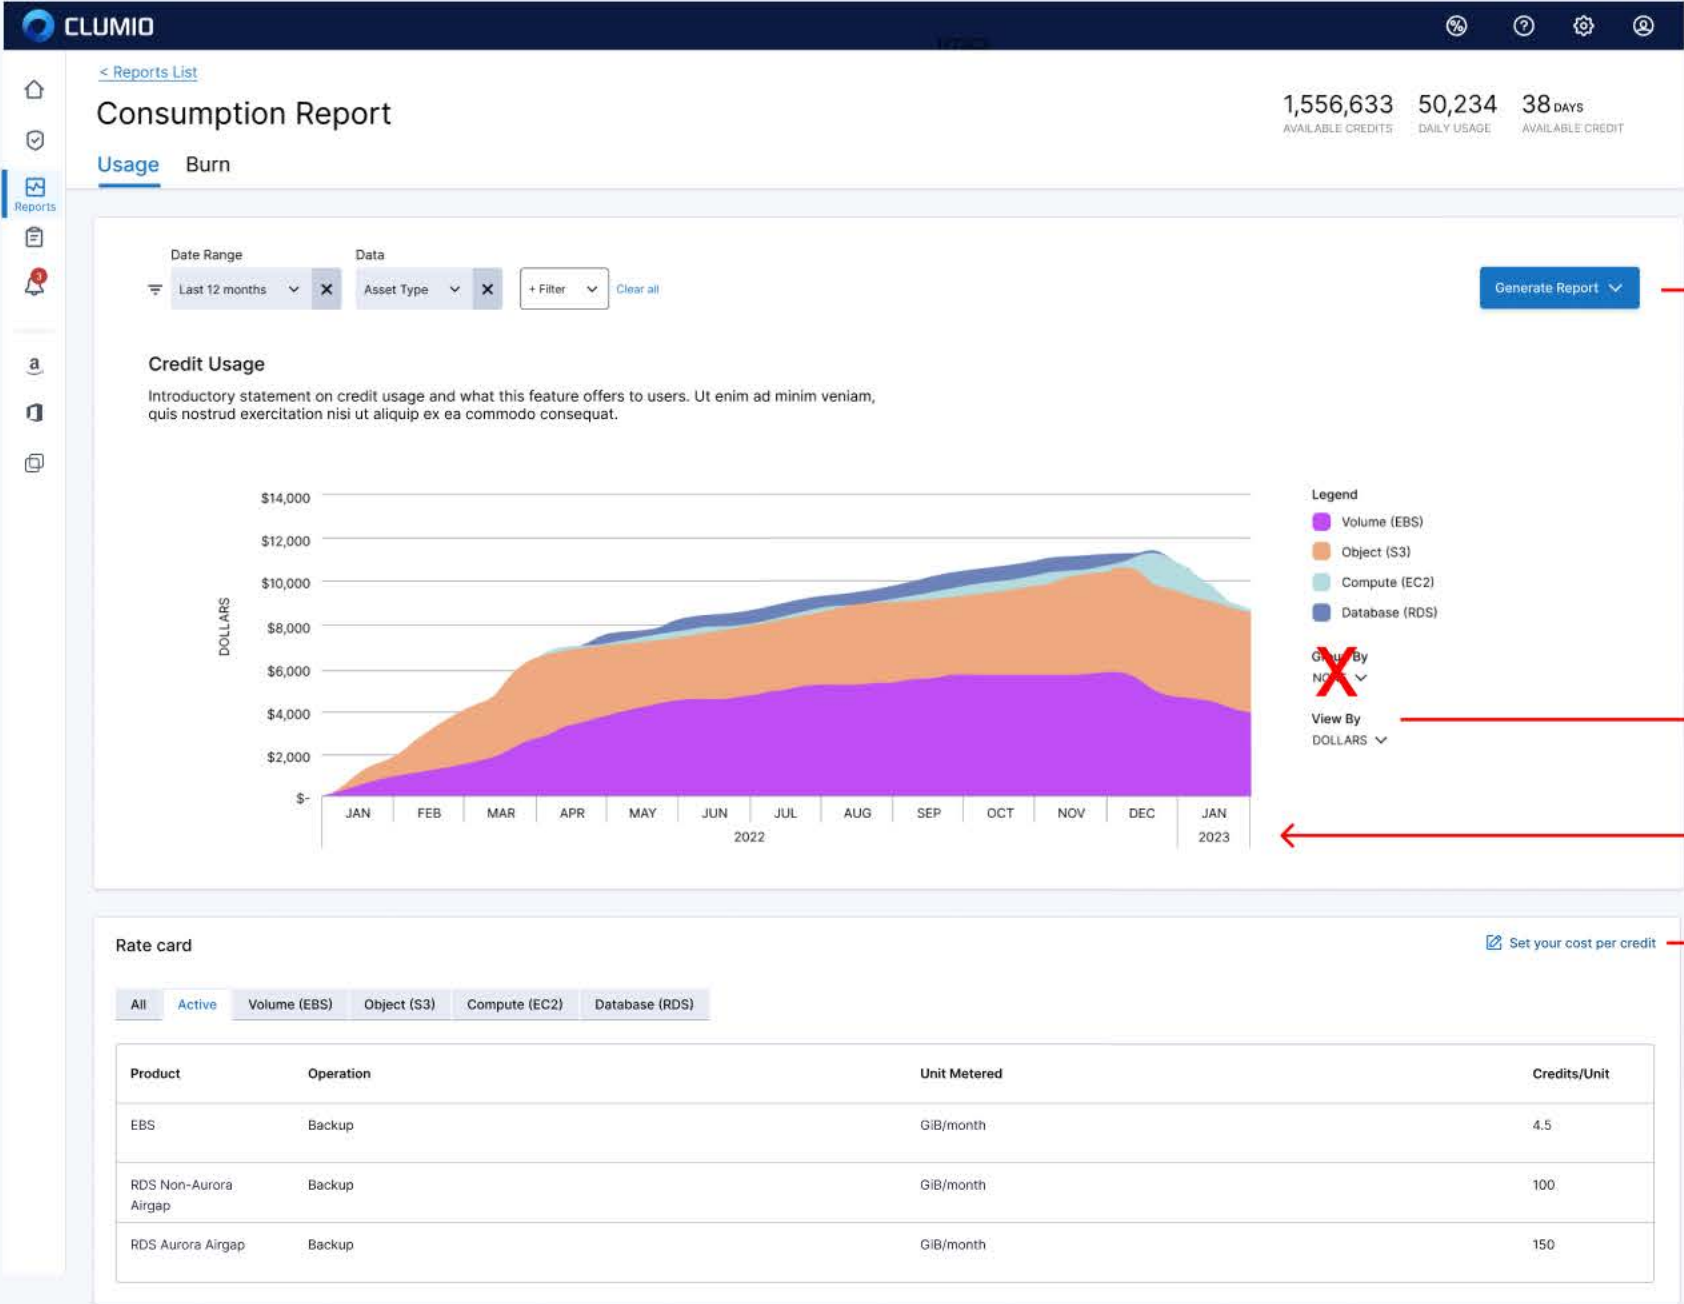

**Legend**

- Natural Gas
- District Heat
- Electricity

**Rate Card**

Product	Operation	Consumption (kWh)	Unit	Rate
Electricity	Electricity	1,234	kWh	\$0.10
District Heat	District Heat	2,345	kWh	\$0.15
Natural Gas	Natural Gas	1,945	kWh	\$0.20

[illegible]

Click to open the report listing

When generating a report a spinner is visible on the button.

First-time use

Generate a report

Export all your data with the applied filters and formatting in CSV format.

Generate a report

Generating ...

Click to generate a new report

Generating report state (if beyond time threshold) no cancel

Click to download the report auto-naming convention is "report\_type\_timestamp.csv"

View by drop menu

CREDITS

USAGE

DOLLARS (set cost per credit)

Credits is the default

Default metric is "Backup size". User can still select between the different metrics and render the chart

Dollars selection is inactive (i.e. NOT selectable) until the user sets a rate. CTA is always visible, regardless of rate set or not.

Show the costs you pay in the report per credit in dollars.

Amount Paid

\$ 0.10 per credit

Cancel Update

When opened this UI replaces the drop menu. User clicking outside of component or clicking "Cancel" closes the component.

Once rate is set the chart can be displayed with the "View by" set as dollar

This value is saved across sessions / per user and remains until the user modifies it.

Clicking "Update" will close the component and update the value where it was initiated.

Data Tooltip

09/24/2022

User: 1,085 credits

Database: 7 credits

Compute: 106 credits

Object: 1 credit

Volume: 115 credits

We're showing a vertical slice of data on a given day. We show by color, type, count in credits.

This is an additional style not outlined in the tooltip specification.

09/24/2022

User: 1,085 credits

Database: 7 credits

Compute: 106 credits

Object: 1 credit

Volume: 115 credits

Offload the display of types into the tooltip and remove it from the legend.

### Analysis of Dr. Erickson:

97

MD INSIDER  
SCORE

Dr. Erickson's MD Insider Score of 97/100 is in the top 3% compared to her peers for this condition.

LOW

COMPLICATION  
RATES

This is very good. Low complication rates mean lower than average rates of infection and potentially lower readmission rates.

220+

CASES IN THE  
LAST 3 YEARS

Dr. Erickson is in the top 8% compared to her peers for number of Anterior Cruciate ligament (ACL) repair cases in the last 3 years.

Ranked in the top 10% for ACL Repair in Los Angeles
